

Montana Natural Heritage - SOC Report

Animal Species of Concern

Species List Last Updated **09/25/2018**

A program of the Montana State Library's
Natural Resource Information System
operated by the University of Montana.

214 Species of Concern
94 Potential Species of Concern
2 Special Status Species
All Records (no filtering)

Introduction

The Montana Natural Heritage Program (MTNHP) serves as the state's information source for animals, plants, and plant communities with a focus on species and communities that are rare, threatened, and/or have declining trends and as a result are at risk or potentially at risk of extirpation in Montana.

This report on **Montana Animal Species of Concern** is produced jointly by the Montana Natural Heritage Program (MTNHP) and Montana Department of Fish, Wildlife, and Parks (MFWP). Montana Animal Species of Concern are native Montana animals that are considered to be "at risk" due to declining population trends, threats to their habitats, and/or restricted distribution.

Also included in this report are **Potential Animal Species of Concern** – animals for which current, often limited, information suggests potential vulnerability or for which additional data are needed before an accurate status assessment can be made.

We also include **Special Status Species** which are species that have some legal protections in place, but are otherwise not Montana Species of Concern. Bald Eagle is a Special Status Species because, although it is no longer protected under the Endangered Species Act and is also no longer a Montana Species of Concern, it is still protected under the **Bald and Golden Eagle Protection Act of 1940** (16 U.S.C. 668-668c). Red Knot is not a Montana Species of Concern, having a state rank of **SNA** because of a lack of information on its migratory stopover use of Montana's wetlands. However it is a Special Status Species because it is listed as Threatened in Montana under the Endangered Species Act (16 U.S.C. 1531-1544).

Over the last 200 years, 5 species with historic breeding ranges in Montana have been extirpated from the state; Woodland Caribou (*Rangifer tarandus*), Greater Prairie-Chicken (*Tympanuchus cupido*), Passenger Pigeon (*Ectopistes migratorius*), Pilose Crayfish (*Pacifastacus gambelii*), and Rocky Mountain Locust (*Melanoplus spretus*). Designation as a Montana Animal Species of Concern or Potential Animal Species of Concern is not a statutory or regulatory classification. Instead, these designations provide a basis for resource managers and decision-makers to make proactive decisions regarding species conservation and data collection priorities in order to avoid additional extirpations.

Status determinations are made by MTNHP and MFWP biologists in consultation with representatives of the Montana Chapter of the Wildlife Society, the Montana Chapter of the American Fisheries Society, and other experts. The process for evaluating and assigning status designations uses the Natural Heritage Program ranking system, described below, which forms the basis for identifying Montana Species of Concern.

How to Read the Lists

What Species are Included in this Report

Montana Species of Concern are defined as vertebrate animals with a state rank of S1, S2, or S3. Vertebrate species with a rank indicating uncertainty (SU), a "range rank" extending below the S3 cutoff (e.g., S3S4), or those ranked S4 for which there is limited baseline information on status are considered Potential Species of Concern. Because documentation for invertebrates is typically less complete than for vertebrates, only those ranked S1 or S2 are included as SOC. Invertebrates with a range rank extending below S2 (e.g., S2S3) are included as SOC only if their global ranks are G2G3 or G3, or if experts agree their occurrence in Montana has been adequately documented. Other invertebrates of concern with global ranks other than G1, G2, or G3 and with state ranks below S2 or range ranks extending below S2 (e.g., S3S4) are treated as Potential Species of Concern.

Organization of List

Both the list of Species of Concern and the list of Potential Species of Concern are grouped taxonomically in the following order: mammals, birds, reptiles, amphibians, fish, and various invertebrates. Within each taxonomic group you can sort species by common name or scientific name.

County Distribution

This column lists the documented county distribution for each species, including extant and historical occurrences. Any occurrences that cross county boundaries are counted for each county. Many older occurrence records and specimen collections are only known from vague location information and the area mapped as the potential area of observation may be quite large, leading to more than one county being counted.

Additions and Deletions

Species that have been added to or deleted from the SOC list due to changes in their state rank are reported in separate sections below; changes in global ranks are not tracked in this report.

Montana Species Ranking Codes (GRank, SRank)

Montana employs a standardized ranking system to denote **global** (range-wide) and **state** status (NatureServe 2006). Species are assigned numeric ranks ranging from 1 (highest risk, greatest concern) to 5 (demonstrably secure), reflecting the relative degree of risk to the species' viability, based upon available information.

A number of factors are considered in assigning ranks — the number, size and quality of known occurrences or populations, distribution, trends (if known), intrinsic vulnerability, habitat specificity, and definable threats. The process of assigning state ranks for each taxon relies heavily on the number of occurrences and Species Occurrence (OE) ranks, which is a ranking system of the quality (usually A through D) of each known occurrence based on factors such as size (# of individuals) and habitat quality. The remaining factors noted above are also incorporated into the ranking process when they are known. The "State Rank Reason" field in the **Montana Field Guide** provides additional information on the reasons for a particular species' rank.

Rank Definition

- G1 S1** At high risk because of **extremely limited** and/or **rapidly declining** population numbers, range and/or habitat, making it highly vulnerable to global extinction or extirpation in the state.
- G2 S2** At risk because of **very limited** and/or **potentially declining** population numbers, range and/or habitat, making it vulnerable to global extinction or extirpation in the state.
- G3 S3** Potentially at risk because of **limited** and/or **declining** numbers, range and/or habitat, even though it may be abundant in some areas.
- G4 S4** Apparently secure, though it may be quite rare in parts of its range, and/or suspected to be declining.
- G5 S5** Common, widespread, and abundant (although it may be rare in parts of its range). Not vulnerable in most of its range.
- GX SX** Presumed Extinct or Extirpated - Species is believed to be extinct throughout its range or extirpated in Montana. Not located despite intensive searches of historical sites and other appropriate habitat, and small likelihood that it will ever be rediscovered.
- GH SH** Historical, known only from records usually 40 or more years old; may be rediscovered.
- GNR SNR** Not Ranked as of yet.
- GU SU** Unrankable - Species currently unrankable due to lack of information or due to substantially conflicting information about status or trends.
- GNA SNA** A conservation status rank is not applicable because the species or ecosystem is not a suitable target for conservation activities as a result of being: 1) not confidently present in the state; 2) non-native or introduced; 3) a long distance migrant with accidental or irregular stopovers; or 4) a hybrid without conservation value.

Combination or Range Ranks

G#G#

or
S#S# Indicates a range of uncertainty about the status of the species (e.g., G1G3 = Global Rank ranges between G1 and G3).

S#S#

S#, S# Indicates that populations in different geographic portions of the species' range in Montana have a different conservation status (e.g., S1 west of the Continental Divide and S4 east of the Continental Divide).

Sub-rank

T# Rank of a subspecies or variety. Appended to the global rank of the full species, e.g. G4T3

Qualifiers

- Q** **Questionable** taxonomy that may reduce conservation priority-Distinctiveness of this entity as a taxon at the current level is questionable; resolution of this uncertainty may result in change from a species to a subspecies or hybrid, or inclusion of this taxon in another taxon, with the resulting taxon having a lower-priority (numerically higher) conservation status rank. Appended to the global rank, e.g. G3Q
- ?** **Inexact Numeric Rank** - Denotes uncertainty; inexactness.
- HYB** **Hybrid** - Entity not ranked because it represents an interspecific hybrid and not a species.
- C** **Captive or Cultivated Only** - Species at present exists only in captivity or cultivation, or as a reintroduced population not yet established.
- A** **Accidental** - Species is accidental or casual in Montana, in other words, infrequent and outside usual range. Includes species (usually birds or butterflies) recorded once or only a few times at a location. A few of these species may have bred on the few occasions they were recorded.
- SYN** **Synonym** - Species reported as occurring in Montana, but the Montana Natural Heritage Program does not recognize the taxon; therefore the species is not assigned a rank.
- B** **Breeding** - Rank refers to the breeding population of the species in Montana. Appended to the state rank, e.g. S2B, S5N = At risk during breeding season, but common in the winter
- N** **Nonbreeding** - Rank refers to the non-breeding population of the species in Montana. Appended to the state rank, e.g. S5B, S2N = Common during breeding season, but at risk in the winter
- M** **Migratory** - Species occurs in Montana only during migration.

Federal Status

Designations in this column reflect the status of a species under the U.S. Endangered Species Act (ESA), or as "sensitive" by the U.S. Forest Service (USFS) or Bureau of Land Management (BLM).

U.S. Fish and Wildlife Service (Endangered Species Act)

Status of a taxon under the federal Endangered Species Act of 1973
(16 U.S.C.A. § 1531-1543 (Supp. 1996))

Designation Descriptions

LE	Listed endangered: Any species in danger of extinction throughout all or a significant portion of its range (16 U.S.C. 1532(6)).
LT	Listed threatened: Any species likely to become an endangered species within the foreseeable future throughout all or a significant portion of its range (16 U.S.C. 1532(20)).
C	Candidate: Those taxa for which sufficient information on biological status and threats exists to propose to list them as threatened or endangered. We encourage their consideration in environmental planning and partnerships; however, none of the substantive or procedural provisions of the Act apply to candidate species.
P	Proposed threatened: Any species that is proposed in the Federal Register to be listed under section 4 of the Act.
DM	Recovered, delisted, and being monitored - Any previously listed species that is now recovered, has been delisted, and is being monitored.
NL	Not listed - No designation.
XE	Experimental - Essential population - An experimental population whose loss would be likely to appreciably reduce the likelihood of the survival of the species in the wild.
XN	Experimental - Nonessential population - An experimental population of a listed species reintroduced into a specific area that receives more flexible management under the Act.
CH	Critical Habitat - The specific areas (i) within the geographic area occupied by a species, at the time it is listed, on which are found those physical or biological features (I) essential to conserve the species and (II) that may require special management considerations or protection; and (ii) specific areas outside the geographic area occupied by the species at the time it is listed upon determination that such areas are essential to conserve the species.
PS	Partial status - status in only a portion of the species' range. Typically indicated in a "full" species record where an infraspecific taxon or population, that has a record in the database has USESA status, but the entire species does not. For example, Yellow-billed Cuckoo (<i>Coccyzus americanus</i>) is ranked PS:LT . Partial Status - Listed Threatened. Designated as Threatened in the Western U.S. Distinct Population Segment (DPS) (subspecies <i>occidentalis</i>)
BGEPA	The Bald and Golden Eagle Protection Act of 1940 (BGEPA) - (16 U.S.C. 668-668c) prohibits anyone, without a permit issued by the Secretary of the Interior, from taking bald or golden eagles, including their parts, nests, or eggs. The BGEPA provides criminal and civil penalties for persons who take, possess, sell, purchase, barter, offer to sell, purchase or barter, transport, export or import, at any time or any manner, any bald eagle ... [or any golden eagle], alive or dead, or any part, nest, or egg thereof. The BGEPA defines take as pursue, shoot, wound, kill, capture, trap, collect, molest or disturb. "Disturb" means to agitate or bother a bald or golden eagle to a degree that causes, or is likely to cause, based on the best scientific information available, 1) injury to an eagle, 2) a decrease in its productivity, by substantially interfering with normal breeding, feeding, or sheltering behavior, or 3) nest abandonment, by substantially interfering with normal breeding, feeding, or sheltering behavior. In addition to immediate impacts, this definition also covers impacts that result from human-induced alterations initiated around a previously used nest site during a time when eagles are not present, if, upon the eagles return, such alterations agitate or bother an eagle to a degree that injures an eagle or substantially interferes with normal breeding, feeding, or sheltering habits and causes, or is likely to cause, a loss of productivity or nest abandonment.
MBTA	The Migratory Bird Treaty Act (MBTA) - (16 U.S.C. §§ 703-712, July 3, 1918, as amended 1936, 1960, 1968, 1969, 1974, 1978, 1986 and 1989) implements four treaties that provide for international protection of migratory birds. The statute's language is clear that actions resulting in a "taking" or possession (permanent or temporary) of a protected species, in the absence of a U.S. Fish and Wildlife Service (USFWS) permit or regulatory authorization, are a violation of the MBTA. The MBTA states, "Unless and except as permitted by regulations ... it shall be unlawful at any time, by any means, or in any manner to pursue, hunt, take, capture, kill ... possess, offer for sale, sell ... purchase ... ship, export, import ... transport or cause to be transported ... any migratory bird, any part, nest, or eggs of any such bird [The Act] prohibits the taking, killing, possession, transportation, import and export of migratory birds, their eggs, parts, and nests, except when specifically authorized by the Department of the Interior." The word "take" is defined by regulation as "to pursue, hunt, shoot, wound, kill, trap, capture, or collect, or attempt to pursue, hunt, shoot, wound, kill, trap, capture, or collect." The USFWS maintains a list of species protected by the MBTA at 50 CFR 10.13. This list includes over one thousand species of migratory birds, including eagles and other raptors, waterfowl, shorebirds, seabirds, wading birds, and passerines. The USFWS also maintains a list of species not protected by the MBTA. MBTA does not protect species that are not native to the United States or species groups not explicitly covered under the MBTA; these include species such as the house (English) sparrow, European starling, rock dove (pigeon), Eurasian collared-dove, and non-migratory upland game birds.
BCC	The 1988 amendment to the Fish and Wildlife Conservation Act mandates the U.S. Fish and Wildlife Service to identify species, subspecies, and populations of all migratory nongame birds that, without additional conservation actions, are likely to become candidates for listing under the Endangered Species Act. Birds of Conservation Concern 2008 (BCC 2008) is the most recent effort to carry out this mandate. The overall goal of this report is to accurately identify the migratory and non-migratory bird species (beyond those already designated as federally threatened or endangered) that represent the Service's highest conservation priorities. BCC10, BCC11, and BCC17 designations represent inclusion on the Birds of Conservation Concern list for Bird Conservation Region 10, 11, and 17 in Montana, respectively.

Bureau of Land Management (BLM)

BLM Sensitive Species are defined by the BLM 6840 Manual as native species found on BLM-administered lands for which the BLM has the capability to significantly affect the conservation status of the species through management, and either: (1) there is information that a species has recently undergone, is undergoing, or is predicted to undergo a downward trend such that the viability of the species or a distinct population segment of the species is at risk across all or a significant portion of the species range, or; (2) the species depends on ecological refugia or specialized or unique habitats on BLM-administered lands, and there is evidence that such areas are threatened with alteration such that the continued viability of the species in that area would be at risk.

Designation Descriptions

Endangered	Denotes species that are listed as Endangered under the Endangered Species Act
Threatened	Denotes species that are listed as Threatened under the Endangered Species Act
Sensitive	Denotes species listed as Sensitive on BLM lands

U.S. Forest Service (USFS)

Designation Descriptions

Endangered	Listed as Endangered (LE) under the U.S. Endangered Species Act.
Threatened	Listed as Threatened (LT) under the U.S. Endangered Species Act.
Proposed	Any species that is proposed in the Federal Register to be listed under section 4 of the Act.

Candidate	Those taxa for which sufficient information on biological status and threats exists to propose to list them as threatened or endangered. We encourage their consideration in environmental planning and partnerships; however, none of the substantive or procedural provisions of the Act apply to candidate species.
Sensitive	U.S. Forest Service Manual (2670.22) defines Sensitive Species on Forest Service lands as those for which population viability is a concern as evidenced by a significant downward trend in population or a significant downward trend in habitat capacity. These designations were last updated in 2011 and they apply only on USFS-administered lands with land management plans finalized prior to 2017. Sensitive Species designations are being replaced by Species of Conservation Concern designations on individual National Forest as revised land management plans are finalized under the 2012 planning rule.
Species of Conservation Concern	A species, other than federally recognized Threatened, Endangered, Proposed, or Candidate species, that is known to occur in the plan area and for which the regional forester has determined that the best available scientific information indicates substantial concern about the species' capability to persist over the long-term in the plan area (36 CFR 219.9). Species of Conservation Concern replace regional forester Sensitive Species on individual National Forests as revised land management plans are finalized under the 2012 planning rule.

Acknowledgements

MTNHP and MFWP staff work together on a daily basis to manage information used to evaluate the status of Montana's animal species. We extend our thanks to these individuals and professional biologists that study and work to conserve species across Montana. We also thank a number of private citizens that spend a great deal of their free time contributing valuable information to statewide databases so that species can be better understood and managed.

Species of Concern

214 Species

All Records (no filtering)

MAMMALS (MAMMALIA)										26 SPECIES
SCIENTIFIC NAME COMMON NAME TAXA SORT	FAMILY (SCIENTIFIC) FAMILY (COMMON)	GLOBAL RANK	STATE RANK	USFWS	USFS	BLM	FWP/SPAW	% OF GLOBAL BREEDING RANGE IN MT	% OF MT THAT IS BREEDING RANGE	HABITAT
Antrozous pallidus Pallid Bat	Vespertilionidae Bats	G4	S3		Sensitive - Known on Forests (CG)	SENSITIVE	SGCN3	0%	6%	Arid land rock outcrops
<p>Species Occurrences verified in these Counties: Carbon, Musselshell, Powder River, Rosebud, Yellowstone</p> <p>State Rank Reason: Species is rare within range and data to assess threats and population trends does not exist. Limited distribution and low fecundity make this species intrinsically vulnerable to threats.</p>										
Blarina brevicauda Northern Short-tailed Shrew	Soricidae Shrews	G5	S1S3				SGCN1-3	1%	1%	Wetlands
<p>Species Occurrences verified in these Counties: Sheridan</p>										
Bos bison Bison	Bovidae Bison / Goat / Sheep	G4	S2				SGCN2	4%	1%	Grasslands
<p>Species Occurrences verified in these Counties: Carbon, Gallatin, Lake, Madison, Park, Sanders, Stillwater, Sweet Grass</p>										
Brachylagus idahoensis Pygmy Rabbit	Leporidae Rabbits	G4	S3		Sensitive - Known on Forests (BD)	SENSITIVE	SGCN3	2%	4%	Sagebrush
<p>Species Occurrences verified in these Counties: Beaverhead, Deer Lodge, Madison</p> <p>State Rank Reason: Species occupies a limited distribution within the state and threats to sagebrush habitat including development and conifer encroachment may affect long-term persistence.</p>										
Corynorhinus townsendii Townsend's Big-eared Bat	Vespertilionidae Bats	G4	S3		Sensitive - Known on Forests (BD, BRT, CG, FLAT, HLC, KOOT, LOLO)	SENSITIVE	SGCN3	5%	87%	Caves in forested habitats
<p>Species Occurrences verified in these Counties: Beaverhead, Big Horn, Blaine, Broadwater, Carbon, Carter, Cascade, Chouteau, Custer, Fergus, Flathead, Gallatin, Garfield, Granite, Jefferson, Judith Basin, Lake, Lewis and Clark, Lincoln, Madison, McCone, Meagher, Mineral, Missoula, Musselshell, Park, Phillips, Powder River, Powell, Prairie, Ravalli, Richland, Roosevelt, Rosebud, Sanders, Silver Bow, Treasure, Valley, Yellowstone</p> <p>State Rank Reason: Species is widespread, but uncommon and appears to occur at low densities. Disturbance of cave and mine roosts and the hard closure of occupied mines threaten long-term persistence.</p>										
Cynomys leucurus White-tailed Prairie Dog	Sciuridae Squirrels	G4	S1		Sensitive - Known on Forests (CG)	SENSITIVE	SGCN1	1%	1%	Sagebrush grassland
<p>Species Occurrences verified in these Counties: Carbon</p> <p>State Rank Reason: Within Montana, this species is found only in a small geographic area and the total population exists within a few colonies. The population appears to have declined over the last few decades, and faces ongoing threats from sylvatic plague.</p>										
Cynomys ludovicianus Black-tailed Prairie Dog	Sciuridae Squirrels	G4	S3		Sensitive - Known on Forests (CG)	SENSITIVE	SGCN3	15%	71%	Grasslands
<p>Species Occurrences verified in these Counties: Big Horn, Blaine, Carbon, Carter, Cascade, Chouteau, Custer, Fallon, Fergus, Garfield, Golden Valley, Hill, Jefferson, Judith Basin, Lewis and Clark, Liberty, McCone, Musselshell, Petroleum, Phillips, Powder River, Prairie, Richland, Rosebud, Stillwater, Sweet Grass, Toole, Treasure, Valley, Wheatland, Yellowstone</p> <p>State Rank Reason: Across much of eastern Montana this species occurs in areas with suitable soil and topography. However sylvatic plague has caused the species to decline and has affected colony size and dynamics. Ongoing threats from disease and persecution due to perceived competition with grazing make long-term status of this species uncertain.</p>										
Euderma maculatum Spotted Bat	Vespertilionidae Bats	G4	S3		Sensitive - Known on Forests (BD, CG)	SENSITIVE	SGCN3, SGIN	5%	27%	Cliffs with rock crevices
<p>Species Occurrences verified in these Counties: Beaverhead, Big Horn, Blaine, Broadwater, Carbon, Cascade, Chouteau, Dawson, Fergus, Gallatin, Jefferson, Lewis and Clark, Madison, Musselshell, Phillips, Powder River, Richland, Rosebud, Silver Bow, Treasure, Yellowstone</p> <p>State Rank Reason: Little is known about this species in Montana. Although widely distributed, the species is quite rare in almost all of its range. Little is known about trends in abundance or occupancy, or life history.</p>										
Gulo gulo Wolverine	Mustelidae Weasels	G4	S3	P	Proposed on Forests (BD, BRT, CG, FLAT, HLC, KOOT, LOLO)	SENSITIVE	SGCN3	0%	37%	Boreal Forest and Alpine Habitats
<p>Species Occurrences verified in these Counties: Beaverhead, Broadwater, Carbon, Cascade, Deer Lodge, Flathead, Gallatin, Glacier, Granite, Jefferson, Judith Basin, Lake, Lewis and Clark, Lincoln, Madison, Meagher, Mineral, Missoula, Park, Pondera, Powell, Ravalli, Sanders, Silver Bow, Stillwater, Sweet Grass, Teton, Wheatland</p>										
Lasiurus borealis Eastern Red Bat	Vespertilionidae Bats	G3G4	S3					0%	46%	Riparian forest

		<p>Species Occurrences verified in these Counties: Big Horn, Blaine, Carbon, Carter, Chouteau, Custer, Daniels, Fergus, Garfield, Glacier, Hill, Lewis and Clark, McCone, Musselshell, Park, Petroleum, Phillips, Powder River, Prairie, Richland, Roosevelt, Rosebud, Sweet Grass, Toole, Valley, Wheatland, Yellowstone</p> <p>State Rank Reason: Recent surveys using acoustic detectors have shown this species to be present across much of central and eastern Montana during the summer and fall. Tree roosting bat species, including the Eastern Red Bat, are commonly killed at wind farms, which presents a substantial threat to the long-term viability of populations within the state.</p>								
Lasiurus cinereus Hoary Bat	Vespertilionidae Bats	G3G4	S3				SGCN3	2%	100%	Riparian and forest
		<p>Species Occurrences verified in these Counties: Beaverhead, Big Horn, Blaine, Broadwater, Carbon, Carter, Cascade, Chouteau, Custer, Daniels, Dawson, Deer Lodge, Fallon, Fergus, Flathead, Gallatin, Garfield, Glacier, Golden Valley, Granite, Hill, Jefferson, Judith Basin, Lake, Lewis and Clark, Liberty, Lincoln, Madison, McCone, Meagher, Mineral, Missoula, Musselshell, Park, Petroleum, Phillips, Pondera, Powder River, Powell, Prairie, Ravalli, Richland, Roosevelt, Rosebud, Sanders, Sheridan, Silver Bow, Stillwater, Sweet Grass, Teton, Toole, Treasure, Valley, Wheatland, Wibaux, Yellowstone</p>								
Lynx canadensis Canada Lynx	Felidae Cats	G5	S3	LT; CH	Threatened on Forests (BD, BRT) Threatened, Critical Habitat on Forests (CG, FLAT, HLC, KOOT, LOLO)	THREATENED	SGCN3	1%	40%	Subalpine conifer forest
		<p>Species Occurrences verified in these Counties: Carbon, Flathead, Gallatin, Glacier, Granite, Lake, Lewis and Clark, Lincoln, Missoula, Park, Pondera, Powell, Stillwater, Sweet Grass, Teton</p>								
Mustela nigripes Black-footed Ferret	Mustelidae Weasels	G1	S1	LE; XN	Endangered, Experimental Nonessential on Forests (CG)	ENDANGERED	SGCN1	12%	1%	Grasslands
		<p>Species Occurrences verified in these Counties: Big Horn, Blaine, Fergus, Garfield, Petroleum, Phillips, Valley</p>								
Myotis lucifugus Little Brown Myotis	Vespertilionidae Bats	G3	S3				SGCN3	3%	100%	Generalist
		<p>Species Occurrences verified in these Counties: Beaverhead, Big Horn, Blaine, Broadwater, Carbon, Carter, Cascade, Chouteau, Custer, Daniels, Dawson, Deer Lodge, Fallon, Fergus, Flathead, Gallatin, Garfield, Glacier, Golden Valley, Granite, Hill, Jefferson, Judith Basin, Lake, Lewis and Clark, Lincoln, Madison, McCone, Meagher, Mineral, Missoula, Musselshell, Park, Petroleum, Phillips, Pondera, Powder River, Powell, Prairie, Ravalli, Richland, Roosevelt, Rosebud, Sanders, Sheridan, Silver Bow, Stillwater, Sweet Grass, Teton, Toole, Treasure, Valley, Wheatland, Wibaux, Yellowstone</p> <p>State Rank Reason: Species is common and widespread, but under significant threat of catastrophic declines due to White-Nose Syndrome, a fungal disease responsible for the collapse of populations of this species in the eastern US.</p>								
Myotis septentrionalis Northern Myotis	Vespertilionidae Bats	G1G2	S2	LT	Threatened on Forests (CG)	THREATENED		0%	8%	Riparian and mixed forest
		<p>Species Occurrences verified in these Counties: Dawson, Richland, Roosevelt</p> <p>State Rank Reason: In Montana this species is known to occupy specific habitat within a limited range along the Missouri and Yellowstone river drainages near the North Dakota border. Populations of this species in the eastern US have undergone catastrophic declines due to White-Nose Syndrome, a fungal disease of bats. Although WNS is not known to be present in Montana, its eventual spread to the state presents a substantial threat to the persistence of this species.</p>								
Myotis thysanodes Fringed Myotis	Vespertilionidae Bats	G4	S3			SENSITIVE	SGCN3	0%	64%	Riparian and dry mixed conifer forest
		<p>Species Occurrences verified in these Counties: Beaverhead, Big Horn, Blaine, Broadwater, Carbon, Carter, Cascade, Custer, Deer Lodge, Fergus, Flathead, Gallatin, Granite, Jefferson, Judith Basin, Lake, Lewis and Clark, Lincoln, Madison, Meagher, Mineral, Missoula, Powder River, Powell, Prairie, Ravalli, Rosebud, Sanders, Silver Bow, Teton, Treasure</p> <p>State Rank Reason: Although this species is distributed across much of Montana, recent surveys have found it to be uncommon within range. Species occasionally uses caves to over-winter so threats to persistence from White-Nose Syndrome are a concern, but due to its western distribution the extent of impacts are as yet unknown.</p>								
Pekania pennanti Fisher	Mustelidae Weasels	G5	S3		Sensitive - Known on Forests (BD, BRT, FLAT, HLC, KOOT, LOLO)	SENSITIVE	SGCN3	1%	31%	Mixed conifer forests

Pelecanus erythrorhynchos American White Pelican	Pelecanidae Pelicans	G4	S3B	MBTA			SGCN3	6%	1%	Lakes, ponds, reservoirs
		Species Occurrences verified in these Counties: Broadwater, Phillips, Pondera, Roosevelt, Sheridan, Teton								
Picoides arcticus Black-backed Woodpecker	Picidae Woodpeckers	G5	S3	MBTA	Sensitive - Known on Forests (BD, BRT, CG, FLAT, HLC, KOOT, LOLO)	SENSITIVE	SGCN3	2%	49%	Conifer forest burns
		Species Occurrences verified in these Counties: Broadwater, Flathead, Gallatin, Lewis and Clark, Lincoln, Madison, Mineral, Missoula, Powder River, Powell, Ravalli, Rosebud, Sanders								
Pipilo chlorurus Green-tailed Towhee	Passerellidae New World Sparrows	G5	S3B	MBTA			SGCN3	3%	60%	Shrub woodland
		Species Occurrences verified in these Counties: Beaverhead, Big Horn, Blaine, Broadwater, Carbon, Chouteau, Custer, Deer Lodge, Fergus, Gallatin, Garfield, Granite, Jefferson, Judith Basin, Lewis and Clark, Madison, Meagher, Musselshell, Park, Petroleum, Phillips, Powder River, Silver Bow, Stillwater, Sweet Grass, Valley, Wheatland, Yellowstone State Rank Reason: Populations in Montana and across the Northern Rockies have undergone recent declines.								
Plegadis chihi White-faced Ibis	Threskiornithidae Ibises	G5	S3B	MBTA		SENSITIVE	SGCN3	4%	45%	Wetlands
		Species Occurrences verified in these Counties: Beaverhead, Carter, Cascade, Chouteau, Phillips, Roosevelt, Sheridan, Teton								
Podiceps auritus Horned Grebe	Podicipedidae Grebes	G5	S3B	MBTA; BCC11; BCC17			SGCN3	3%	77%	Wetlands
		Species Occurrences verified in these Counties: Cascade, Chouteau, Flathead, Lake, Phillips, Powell, Sheridan, Teton								
Poecile hudsonicus Boreal Chickadee	Paridae Chickadees	G5	S3	MBTA			SGCN3	1%	14%	Spruce-fir forests
		Species Occurrences verified in these Counties: Flathead, Glacier, Lincoln, Teton								
Poliophtila caerulea Blue-gray Gnatcatcher	Poliophtilidae Gnatcatchers	G5	S2B	MBTA	Sensitive - Known on Forests (CG)	SENSITIVE	SGCN2	0%	1%	Utah juniper
		Species Occurrences verified in these Counties: Broadwater, Carbon, Jefferson								
Psiloscops flammeolus Flammulated Owl	Strigidae Owls	G4	S3B	MBTA; BCC10	Sensitive - Known on Forests (BD, BRT, FLAT, HLC, KOOT, LOLO) Sensitive - Suspected on Forests (CG)	SENSITIVE	SGCN3	2%	36%	Dry conifer forest
		Species Occurrences verified in these Counties: Beaverhead, Broadwater, Flathead, Gallatin, Granite, Jefferson, Lake, Lewis and Clark, Lincoln, Madison, Mineral, Missoula, Powell, Ravalli, Sanders								
Rhynchophanes mccownii McCown's Longspur	Calcariidae Longspurs and Snow Buntings	G4	S3B	MBTA; BCC10; BCC11; BCC17		SENSITIVE	SGCN3	41%	79%	Grasslands
		Species Occurrences verified in these Counties: Beaverhead, Blaine, Broadwater, Chouteau, Daniels, Fergus, Glacier, Golden Valley, Hill, Judith Basin, Lewis and Clark, Liberty, Madison, Mccone, Musselshell, Petroleum, Phillips, Pondera, Roosevelt, Rosebud, Sheridan, Stillwater, Sweet Grass, Teton, Toole, Valley, Wheatland, Yellowstone State Rank Reason: Species faces threats from cover type conversion and altered grazing and fire regimes, and although populations in the core of their breeding range in northeast Montana appear to be relatively stable, declines are occurring in much of the species' global breeding range.								
Spizella breweri Brewer's Sparrow	Passerellidae New World Sparrows	G5	S3B	MBTA; BCC10; BCC17		SENSITIVE	SGCN3	12%	100%	Sagebrush
		Species Occurrences verified in these Counties: Beaverhead, Big Horn, Blaine, Broadwater, Carbon, Carter, Chouteau, Custer, Dawson, Deer Lodge, Fallon, Fergus, Flathead, Gallatin, Garfield, Glacier, Golden Valley, Granite, Hill, Jefferson, Lake, Lewis and Clark, Liberty, Lincoln, Madison, Mccone, Meagher, Missoula, Musselshell, Park, Petroleum, Phillips, Pondera, Powder River, Powell, Prairie, Ravalli, Richland, Roosevelt, Rosebud, Sanders, Silver Bow, Stillwater, Sweet Grass, Teton, Toole, Treasure, Valley, Wheatland, Wibaux, Yellowstone State Rank Reason: Species faces threats from loss of sagebrush habitats it is dependent on as a result of habitat conversion for agriculture and increased frequency of fire as a result of weed encroachment and drought.								
Sterna forsteri Forster's Tern	Laridae Gulls / Terns	G5	S3B	MBTA		SENSITIVE	SGCN3	1%	59%	Wetlands
		Species Occurrences verified in these Counties: Beaverhead, Blaine, Cascade, Chouteau, Hill, Lake, Lewis and Clark, Petroleum, Phillips, Powell, Roosevelt, Sheridan, Teton								
Sterna hirundo Common Tern	Laridae Gulls / Terns	G5	S3B	MBTA		SENSITIVE	SGCN3	5%	50%	Large rivers, lakes
		Species Occurrences verified in these Counties: Blaine, Broadwater, Cascade, Chouteau, Daniels, Flathead, Hill, Lake, Mccone, Petroleum, Phillips, Roosevelt, Sheridan, Teton, Valley								
Sternula antillarum Least Tern	Laridae Gulls / Terns	G4	S1B	LE; MBTA	Endangered on Forests (CG)	ENDANGERED	SGCN1, SGIN	1%	10%	Large prairie rivers

		Species Occurrences verified in these Counties: Custer, Dawson, Garfield, Mccone, Prairie, Richland, Roosevelt, Valley, Wibaux								
Strix nebulosa Great Gray Owl	Strigidae Owls	G5	S3	MBTA		SENSITIVE	SGQN3, SGIN	2%	46%	Conifer forest near open meadows
		Species Occurrences verified in these Counties: Beaverhead, Carbon, Deer Lodge, Flathead, Gallatin, Granite, Jefferson, Judith Basin, Lake, Lewis and Clark, Lincoln, Meagher, Missoula, Park, Powell, Ravalli, Silver Bow, Sweet Grass, Teton, Wheatland								
Surnia ulula Northern Hawk Owl	Strigidae Owls	G5	S3	MBTA			SGQN3, SGIN	0%	1%	Conifer forest
		Species Occurrences verified in these Counties: Flathead, Glacier, Teton State Rank Reason: Species has a small population and limited distribution in Montana.								
Troglodytes pacificus Pacific Wren	Troglodytidae Wrens	G5	S3	MBTA			SGQN3	1%	39%	Moist conifer forests
		Species Occurrences verified in these Counties: Beaverhead, Broadwater, Fergus, Flathead, Gallatin, Glacier, Granite, Jefferson, Judith Basin, Lake, Lewis and Clark, Lincoln, Madison, Meagher, Mineral, Missoula, Park, Powell, Ravalli, Sanders, Stillwater, Sweet Grass, Teton								
Tympanuchus phasianellus Sharp-tailed Grouse	Phasianidae Upland Game Birds	G5	SX,S4				SGQN1	6%	100%	Shrub grassland
		Species Occurrences verified in these Counties: State Rank Reason: Populations west of the Continental Divide are extirpated and have a conservation status rank of SX. Populations east of the Continental Divide have a state rank of S4 and are not a Species of Concern.								

REPTILES (REPTILIA)											8 SPECIES
SCIENTIFIC NAME COMMON NAME TAXA SORT	FAMILY (SCIENTIFIC) FAMILY (COMMON)	GLOBAL RANK	STATE RANK	USFWS	USFS	BLM	FWP SWAP	% OF GLOBAL BREEDING RANGE IN MT	% OF MT THAT IS BREEDING RANGE	HABITAT	
Apalone spinifera Spiny Softshell	Trionychidae Softshell Turtles	G5	S3			SENSITIVE	SGQN3	2%	26%	Prairie rivers and larger streams	
		Species Occurrences verified in these Counties: Big Horn, Blaine, Carbon, Cascade, Chouteau, Custer, Dawson, Fergus, Garfield, Golden Valley, Musselshell, Petroleum, Phillips, Prairie, Richland, Rosebud, Stillwater, Teton, Toole, Treasure, Wheatland, Wibaux, Yellowstone									
Chelydra serpentina Snapping Turtle	Chelydridae Snapping Turtles	G5	S3			SENSITIVE	SGQN3, SGIN	1%	26%	Prairie rivers and streams	
		Species Occurrences verified in these Counties: Big Horn, Carbon, Carter, Custer, Dawson, Fallon, Powder River, Richland, Rosebud, Wibaux, Yellowstone State Rank Reason: Little is known about native populations of this species in Montana, which makes assessment of threats and trends difficult. This species has a high age of maturity and low recruitment, making populations vulnerable to extirpation.									
Elgaria coerulea Northern Alligator Lizard	Anguidae Alligator Lizards	G5	S3				SGQN3, SGIN	8%	12%	Talus slopes / rock outcrops	
		Species Occurrences verified in these Counties: Flathead, Granite, Lake, Lincoln, Mineral, Missoula, Ravalli, Sanders

		Species Occurrences verified in these Counties: Big Horn, Blaine, Broadwater, Carbon, Carter, Cascade, Chouteau, Custer, Dawson, Fergus, Gallatin, Garfield, Glacier, Golden Valley, Hill, Lewis and Clark, Liberty, Mccone, Musselshell, Petroleum, Phillips, Pondera, Powder River, Prairie, Richland, Roosevelt, Rosebud, Silver Bow, Stillwater, Sweet Grass, Teton, Toole, Treasure, Valley, Wheatland, Wibaux, Yellowstone									
Plestiodon skiltonianus Western Skink	Scincidae Skinks	G5	S3				SGQN3, SGIN	2%	10%	Open conifer forest and adjacent grasslands	
		Species Occurrences verified in these Counties: Granite, Lincoln, Mineral, Missoula, Ravalli, Sanders									

AMPHIBIANS (AMPHIBIA)											5 SPECIES
-----------------------	--	--	--	--	--	--	--	--	--	--	-----------

SCIENTIFIC NAME COMMON NAME TAXA SORT	FAMILY (SCIENTIFIC) FAMILY (COMMON)	GLOBAL RANK	STATE RANK	USFWS	USFS	BLM	FWP SWAP	% OF GLOBAL BREEDING RANGE IN MT	% OF MT THAT IS BREEDING RANGE	HABITAT
Anaxyrus boreas Western Toad	Bufonidae True Toads	G4	S2		Sensitive - Known on Forests (BD, BRT, CG, FLAT, HLC, KOOT, LOLO)	SENSITIVE	SGCN2	6%	38%	Wetlands, floodplain pools
<p>Species Occurrences verified in these Counties: Beaverhead, Chouteau, Deer Lodge, Flathead, Gallatin, Glacier, Granite, Jefferson, Judith Basin, Lake, Lewis and Clark, Lincoln, Madison, Meagher, Mineral, Missoula, Park, Pondera, Powell, Ravalli, Sanders, Silver Bow, Teton</p> <p>State Rank Reason: Over the last few decades this species has undergone serious declines in abundance due primarily to infection with Chytrid fungus. While declines in breeding site occupancy appear to have stabilized in the last decade, changes to abundance across the species range within Montana remain unknown. Significant threats to the persistence of this species remain from continued impacts of disease and mortality of adults and young during breeding and local migration.</p>										
Anaxyrus cognatus Great Plains Toad	Bufonidae True Toads	G5	S2		Sensitive - Known on Forests (CG)	SENSITIVE	SGCN2	8%	62%	Wetlands, floodplain pools
<p>Species Occurrences verified in these Counties: Big Horn, Blaine, Carter, Cascade, Chouteau, Custer, Garfield, Golden Valley, Hill, Lewis and Clark, Liberty, McCone, Musselshell, Petroleum, Phillips, Powder River, Prairie, Rosebud, Sheridan, Stillwater, Toole, Valley, Yellowstone</p> <p>State Rank Reason: Current trend is unknown due to a scarcity of observations, but long-term declines are possible due to declines in ephemeral waterbodies (bison wallows). Species faces threats from habitat loss including development of native habitat, and reduced availability of burrows due to black-tailed prairie dog declines.</p>										
Dicamptodon aterrimus Idaho Giant Salamander	Dicamptodontidae Giant Salamanders	G3G4	S2				SGCN2	4%	1%	Mountain streams, moist conifer forest
<p>Species Occurrences verified in these Counties: Mineral</p> <p>State Rank Reason: Found only within a small area in western Montana along the Idaho border, little information exists to assess threats. The intrinsic vulnerability and specific habitat requirements of this species in combination with a small known range make declines or extirpation within the state a concern.</p>										
Lithobates pipiens Northern Leopard Frog	Ranidae True Frogs	G5	S1,S4		Sensitive - Known on Forests (CG, HLC, KOOT) Sensitive - Suspected on Forests (BRT, FLAT, LOLO)	SENSITIVE	SGCN1	6%	72%	Wetlands, floodplain pools
<p>Species Occurrences verified in these Counties: Flathead, Lincoln</p> <p>State Rank Reason: Populations within the mountains of western Montana are a Species of Concern with a state rank of S1. Populations on the Great Plains have a state rank of S4 and are not a Species of Concern.</p>										
Plethodon idahoensis Coeur d'Alene Salamander	Plethodontidae Lungless Salamanders	G4	S2		Sensitive - Known on Forests (BRT, KOOT, LOLO)		SGCN2, SGIN	31%	5%	Spring / seep, waterfall, fractured rock
<p>Species Occurrences verified in these Counties: Lincoln, Mineral, Missoula, Ravalli, Sanders</p>										

FISH (ACTINOPTERYGII)										23 SPECIES
SCIENTIFIC NAME COMMON NAME TAXA SORT	FAMILY (SCIENTIFIC) FAMILY (COMMON)	GLOBAL RANK	STATE RANK	USFWS	USFS	BLM	FWP SWAP	% OF GLOBAL BREEDING RANGE IN MT	% OF MT THAT IS BREEDING RANGE	HABITAT
Acipenser transmontanus White Sturgeon	Acipenseridae Sturgeons	G4	S1	LE	Endangered on Forests (KOOT)		SGCN1	1%	1%	Large mountain rivers
<p>Species Occurrences verified in these Counties: Lincoln</p> <p>State Rank Reason: The white sturgeon is currently listed as "S1" in MT due to extremely limited and/or rapidly declining population numbers, range and/or habitat, making it highly vulnerable to global extinction or extirpation in the state. The Kootenai River population of white sturgeon (Kootenai sturgeon) has been declining during at least the past 50 years with only about 500 wild adults remaining. This population was listed as endangered under the Endangered Species Act (ESA) on September 6, 1994 (59 FR 45989) due to the ongoing lack of juvenile recruitment to the population since the 1960s.</p>										
Chrosomus eos Northern Redbelly Dace	Cyprinidae Minnows	G5	S3				SGCN3	4%	27%	Small prairie rivers
<p>Species Occurrences verified in these Counties: Blaine, Cascade, Chouteau, Daniels, Dawson, Fergus, Golden Valley, Hill, Judith Basin, Lewis and Clark, McCone, Meagher, Musselshell, Petroleum, Phillips, Pondera, Richland, Roosevelt, Sheridan, Stillwater, Sweet Grass, Teton, Toole, Valley, Wheatland, Wibaux</p> <p>State Rank Reason: The Northern Redbelly Dace is currently listed as an "S3" species of concern in Montana because they are potentially at risk because of limited and/or declining numbers, range and/or habitat, even though it may be abundant in some areas.</p>										
Chrosomus eos x Chrosomus neogaeus Northern Redbelly X Finescale Dace	Cyprinidae Minnows	GNA	S3			SENSITIVE	SGCN3		20%	Small prairie streams
<p>Species Occurrences verified in these Counties: Blaine, Cascade, Chouteau, Fergus, Golden Valley, Judith Basin, Meagher, Musselshell, Petroleum, Phillips, Pondera, Stillwater, Teton, Valley, Wheatland</p> <p>State Rank Reason: The Northern Redbelly/Finescale Dace Hybrid is currently listed as an "S3" species of concern in Montana because they are potentially at risk because of limited and/or declining numbers, range and/or habitat, even though it may be abundant in some areas.</p>										

Cottus rhotheus Torrent Sculpin	Cottidae Sculpins	G5	S3			SGCN3	2%	3%	Mountain streams, rivers, lakes	
		<p>Species Occurrences verified in these Counties: Flathead, Lincoln</p> <p>State Rank Reason: The torrent sculpin is currently listed as an "S3" species of special concern by the state of Montana (Montana Natural Heritage Program 2004), and is also designated as a sensitive species by the U.S. Forest Service in Region 1 (Lee et al. 1997). A "S3" designation means that the species in Montana is potentially at risk because of limited and potentially declining numbers, extent and/or habitat, even though it may be abundant in some areas.</p>								
Cottus ricei Spoonhead Sculpin	Cottidae Sculpins	G5	S3			SGCN3	1%	1%	Mountain streams, rivers, lakes	
		<p>Species Occurrences verified in these Counties: Glacier</p> <p>State Rank Reason: The spoonhead sculpin is presently listed as a species of special concern (SOC) in MT due to its limited distribution (S3, vulnerable-meaning they are at risk for potential declines in population, range or habitat even though they are abundant in some areas) (MNHP 2004). This species is similarly listed as an SOC in four of the other 14 states or provinces where it presently occurs. It is thought to be extirpated in New York, Illinois and Pennsylvania (Nature Serve 2014).</p>								
Cycleptus elongatus Blue Sucker	Catostomidae Suckers	G3G4	S2S3			SGCN2-3	1%	7%	Large prairie rivers	
		<p>Species Occurrences verified in these Counties: Blaine, Cascade, Chouteau, Custer, Dawson, Fergus, Garfield, Hill, Liberty, McCone, Petroleum, Phillips, Powder River, Prairie, Richland, Roosevelt, Rosebud, Treasure, Valley, Wibaux</p> <p>State Rank Reason: The Blue Sucker is currently listed as an "S2S3" species of concern in Montana because they are potentially at risk of extirpation in the state, because of limited and/or declining numbers, range and/or habitat, even though it may be abundant in some areas.</p>								
Etheostoma exile Iowa Darter	Percidae Perches	G5	S3		SENSITIVE	SGCN3	1%	9%	Small prairie rivers	
		<p>Species Occurrences verified in these Counties: Blaine, Carter, Chouteau, Daniels, Dawson, Fallon, Glacier, Hill, Liberty, McCone, Phillips, Powder River, Richland, Roosevelt, Sheridan, Toole, Valley, Wibaux</p> <p>State Rank Reason: The Iowa Darter is currently listed as an "S3" species of concern in Montana because they are potentially at risk because of limited and/or declining numbers, range and/or habitat, even though it may be abundant in some areas.</p>								
Lepisosteus platostomus Shortnose Gar	Lepisosteidae Gars	G5	S1			SGCN1	1%	1%	Large prairie rivers	
		<p>Species Occurrences verified in these Counties: Custer, Dawson, McCone, Prairie, Richland, Roosevelt, Valley, Wibaux</p> <p>State Rank Reason: The Shortnose Gar is currently ranked as "S1" in Montana because it is at high risk because of extremely limited and/or rapidly declining population numbers, range and/or habitat, making it highly vulnerable to global extinction or extirpation in the state. Due to its recent observations upstream into the Milk River and 70 miles upstream into the Yellowstone River, a new rank assessment may be performed.</p>								
Macrhybopsis gelida Sturgeon Chub	Cyprinidae Minnows	G3	S2S3		SENSITIVE	SGCN2-3	17%	7%	Large prairie rivers	
		<p>Species Occurrences verified in these Counties: Blaine, Cascade, Chouteau, Custer, Dawson, Fergus, McCone, Petroleum, Phillips, Powder River, Prairie, Richland, Roosevelt, Rosebud, Valley, Wibaux</p> <p>State Rank Reason: The Sturgeon Chub is currently listed as an "S2S3" species of concern in Montana because they are potentially at risk of extirpation in the state, because of limited and/or declining numbers, range and/or habitat, even though it may be abundant in some areas. Population losses from the Fort Peck Section of the Missouri River and the Bighorn River are likely permanent, but recent losses from the Powder River basin are being reversed through recolonization (Stagliano 2014).</p>								
Macrhybopsis meeki Sicklefin Chub	Cyprinidae Minnows	G3	S1			SGCN1	16%	3%	Large prairie rivers	
		<p>Species Occurrences verified in these Counties: Blaine, Custer, Dawson, Fergus, McCone, Petroleum, Phillips, Prairie, Richland, Roosevelt, Valley, Wibaux</p> <p>State Rank Reason: The Sicklefin Chub is currently listed as "S1" in MT due to extremely limited and/or rapidly declining population numbers, range and/or habitat, making it highly vulnerable to extirpation in the state. It only occupies specific sections of the large mainstem Missouri and Yellowstone Rivers unaffected by reservoirs.</p>								
Margariscus nachtriebi Northern Pearl Dace	Cyprinidae Minnows	G5	S2		SENSITIVE	SGCN2	1%	1%	Small prairie streams	
		<p>Species Occurrences verified in these Counties: Blaine, Daniels, Hill, McCone, Phillips, Richland, Roosevelt, Sheridan, Valley</p> <p>State Rank Reason: The Pearl Dace is currently listed as an "S2" species of concern in Montana because they are potentially at risk of extirpation in the state, because of limited and/or declining numbers, range and/or habitat, even though it may be abundant in some areas. Pearl Dace are not abundant when they are collected at the relatively few sites in cool, small streams and ponds they are known to inhabit. This factor, as well as introduced Northern Pike invasions into their small prairie streams, has caused them to be designated as a Montana Species of Special Concern vulnerable to extinction in the state.</p>								
Myoxocephalus thompsonii Deepwater Sculpin	Cottidae Sculpins	G5	S3			SGCN3, SGIN	1%	1%	Deep mountain lakes	
		<p>Species Occurrences verified in these Counties: Glacier</p> <p>State Rank Reason: The Deepwater sculpin is presently listed as a species of special concern (SOC) in MT due to its limited distribution (S3, vulnerable-meaning they are at risk for potential declines in population, range or habitat even though they are abundant in some areas) (MNHP 2011).</p>								
Oncorhynchus clarkii bouvieri Yellowstone Cutthroat Trout	Salmonidae Trout	G4T4	S2		Sensitive - Known on Forests (CG)	SENSITIVE	SGCN2		12%	Mountain streams, rivers, lakes
		<p>Species Occurrences verified in these Counties: Big Horn, Carbon, Gallatin, Meagher, Park, Stillwater, Sweet Grass, Yellowstone</p> <p>State Rank Reason: The Yellowstone Cutthroat trout is currently ranked "S2" in Montana because it is at risk because of very limited and/or potentially declining population numbers, range and/or habitat, making it vulnerable to extirpation in the state.</p>								
Oncorhynchus clarkii lewisi Westslope Cutthroat Trout	Salmonidae Trout	G4T4	S2		Sensitive - Known on Forests (BD, BRT, CG, FLAT, HLC, KOOT, LOLO)	SENSITIVE	SGCN2		34%	Mountain streams, rivers, lakes

		<p>Species Occurrences verified in these Counties: Beaverhead, Broadwater, Cascade, Chouteau, Deer Lodge, Fergus, Flathead, Gallatin, Glacier, Granite, Jefferson, Judith Basin, Lake, Lewis and Clark, Lincoln, Madison, Meagher, Mineral, Missoula, Park, Pondera, Powell, Ravalli, Sanders, Silver Bow, Teton, Wheatland</p> <p>State Rank Reason: The Westslope Cutthroat trout is currently ranked "S2" in Montana because it is at risk due to very limited and/or potentially declining population numbers, range and/or habitat, making it vulnerable to extirpation in the state.</p>								
Oncorhynchus mykiss gairdneri Columbia River Redband Trout	Salmonidae Trout	G5T4	S1		Sensitive - Known on Forests (KOOT)		SGCN1	1%	3%	Mountain streams, rivers
		<p>Species Occurrences verified in these Counties: Flathead, Lincoln</p> <p>State Rank Reason: The Columbia River Redband trout is currently ranked "S1" in Montana because it is at extremely high risk of extirpation in the state due to very limited and/or rapidly declining population numbers, range and/or habitat.</p>								
Percopsis omiscomaycus Trout-perch	Percopsidae Trout-perch	G5	S2				SGCN2, SGIN	1%	1%	Deep lakes, mountain streams
		<p>Species Occurrences verified in these Counties: Glacier</p> <p>State Rank Reason: The Trout-Perch is currently listed as an "S2" species of concern in Montana because they are potentially at risk of extirpation in the state, because of limited and/or declining numbers, range and/or habitat, even though it may be abundant in some areas. Limited distribution may be due to the lack of sampling in certain habitats or areas where they may be present</p>								
Polyodon spathula Paddlefish	Polyodontidae Paddlefishes	G4	S2			SENSITIVE	SGCN2	1%	5%	Large prairie rivers
		<p>Species Occurrences verified in these Counties: Blaine, Chouteau, Custer, Dawson, Fergus, Garfield, Hill, Liberty, McCone, Petroleum, Phillips, Prairie, Richland, Roosevelt, Rosebud, Valley, Wibaux</p> <p>State Rank Reason: The paddlefish is currently ranked "S2" in Montana because it is at risk, because of very limited and/or potentially declining population numbers, range and/or habitat, making it vulnerable to global extinction or extirpation in the state.</p>								
Prosopium coulteri Pygmy Whitefish	Salmonidae Trout	G5	S3				SGCN3, SGIN	1%	1%	Deep mountain lakes and tributaries
		<p>Species Occurrences verified in these Counties: Flathead, Lake, Lincoln, Missoula</p> <p>State Rank Reason: The Pygmy Whitefish is currently listed as an "S3" species of concern in Montana because they are potentially at risk because of limited and/or declining numbers, range and/or habitat, even though it may be abundant in some areas.</p>								
Salvelinus confluentus Bull Trout	Salmonidae Trout	G4	S2	LT; CH	Threatened, Critical Habitat on Forests (BD, BRT, FLAT, HLC, KOOT, LOLO)	THREATENED	SGCN2	5%	18%	Mountain streams, rivers, lakes
		<p>Species Occurrences verified in these Counties: Deer Lodge, Flathead, Glacier, Granite, Lake, Lewis and Clark, Lincoln, Mineral, Missoula, Powell, Ravalli, Sanders</p>								
Salvelinus namaycush Lake Trout	Salmonidae Trout	G5	S2				SGCN2		5%	Deep mountain lakes
		<p>Species Occurrences verified in these Counties: Beaverhead, Glacier</p> <p>State Rank Reason: The Native Lake trout is currently ranked "S2" in Montana because it is at risk due to very limited and/or potentially declining population numbers, range and/or habitat, making it vulnerable to extirpation in the state. This species is a glacial relic in Montana known from native (never-stocked) populations occurring in Waterton Lake, Glens Lake, Cosley Lake, and St. Mary Lake in Glacier National Park and Lower St. Mary Lake on the Blackfeet Indian Reservation, as well as a couple of small populations in the upper Missouri River basin. Otherwise, all other populations in the state are introduced.</p>								
Sander canadensis Sauger	Percidae Perches	G5	S2			SENSITIVE	SGCN2	1%	15%	Large prairie rivers
		<p>Species Occurrences verified in these Counties: Big Horn, Blaine, Carbon, Carter, Cascade, Chouteau, Custer, Dawson, Fallon, Fergus, Garfield, Hill, Liberty, McCone, Musselshell, Petroleum, Phillips, Powder River, Prairie, Richland, Roosevelt, Rosebud, Stillwater, Teton, Treasure, Valley, Wibaux, Yellowstone</p> <p>State Rank Reason: The Sauger is currently listed as an "S2" species of concern in Montana because they are at risk of extirpation in the state, because of limited and/or declining numbers, range and/or habitat, even though it may be abundant in some areas. Population losses from the reservoir sections of the Missouri River and the Bighorn River are likely permanent. Competition and hybridization from the introduced walleye is another threat to native sauger populations.</p>								
Scaphirhynchus albus Pallid Sturgeon	Acipenseridae Sturgeons	G2	S1	LE		ENDANGERED	SGCN1	10%	1%	Large prairie rivers
		<p>Species Occurrences verified in these Counties: Blaine, Cascade, Chouteau, Custer, Dawson, Fergus, Garfield, McCone, Petroleum, Phillips, Powder River, Prairie, Richland, Roosevelt, Rosebud, Valley, Wibaux</p> <p>State Rank Reason: The Pallid Sturgeon is currently listed as "S1" in MT due to extremely limited and/or rapidly declining population numbers, range and/or habitat, making it highly vulnerable to global extinction or extirpation in the state. The pallid sturgeon is one of the rarest fishes in North America and was federally listed as endangered in 1990. The Pallid Sturgeon has been declining during at least the past 50 years with only about 200 adults remaining in the upper Missouri River and limited natural reproduction.</p>								
Thymallus arcticus Arctic Grayling	Salmonidae Trout	G5	S1		Sensitive - Known on Forests (BD)	SENSITIVE	SGCN1		5%	Mountain rivers, lakes
		<p>Species Occurrences verified in these Counties: Beaverhead, Deer Lodge, Madison, Silver Bow</p> <p>State Rank Reason: The Arctic Grayling is currently ranked "S1" in Montana because it is at extremely high risk of extirpation in the state due to very limited and/or rapidly declining population numbers, range and/or habitat.</p>								

SCIENTIFIC NAME COMMON NAME TAXA SORT	FAMILY (SCIENTIFIC) FAMILY (COMMON)	GLOBAL RANK	STATE RANK	USFWS	USFS	BLM	FWP SWAP	% OF GLOBAL BREEDING RANGE IN MT	% OF MT THAT IS BREEDING RANGE	HABITAT
BETLES										
<i>Cicindela arenicola</i> Saint Anthony Dune Tiger Beetle	<i>Cicindelidae</i> Tiger Beetles	G1G2	S1S2							Open sand dunes
Species Occurrences verified in these Counties: Beaverhead, Madison State Rank Reason: Species is ranked S1S2 as a result of its global rarity and recently detected occupancy of isolated suitable habitat in the Centennial Sandhills of southwest Montana.										
<i>Microcyloepus browni</i> Brown's Microcyloepus Riffle Beetle	<i>Elmidae</i> Riffle Beetles	G1	S1					100%	1%	Springs
Species Occurrences verified in these Counties: Gallatin State Rank Reason: This riffle beetle is currently listed as "S1" in MT due to extremely limited and/or rapidly declining population numbers, range and/or habitat, making it highly vulnerable to global extinction or extirpation in the state. These warm-spring beetles are generally endemic to only a few locations; this species is endemic to 1 known location, a warm-springs in the Bridger Creek Canyon outside of Bozeman.										
<i>Zaitzevia therae</i> Warm Spring Zaitzevian Riffle Beetle	<i>Elmidae</i> Riffle Beetles	G1	S1					100%	1%	Springs
Species Occurrences verified in these Counties: Gallatin State Rank Reason: This riffle beetle is currently listed as "S1" in MT due to extremely limited and/or rapidly declining population numbers, range and/or habitat, making it highly vulnerable to global extinction or extirpation in the state. These warm-spring beetles are generally endemic to only a few locations; this species is endemic to 1 known location, a warm-springs in the Bridger Creek Canyon outside of Bozeman.										
BUTTERFLIES

<i>Boloria frigga</i> Frigga Fritillary	<i>Nymphalidae</i> Brush-footed Butterflies	G5	S1S2						12%	Montane wetlands
Species Occurrences verified in these Counties: Beaverhead, Gallatin, Madison										
<i>Euphydryas gillettii</i> Gillette's Checkerspot	<i>Nymphalidae</i> Brush-footed Butterflies	G3	S2						42%	Wet meadows
Species Occurrences verified in these Counties: Beaverhead, Cascade, Deer Lodge, Fergus, Flathead, Glacier, Madison, Mineral, Missoula, Pondera, Powell										
<i>Hesperia ottoe</i> Ottoe Skipper	<i>Hesperiidae</i> Skipper Butterflies	G3G4	S2S3						19%	Grasslands
Species Occurrences verified in these Counties: Sheridan										
<i>Polygonia progne</i> Gray Comma	<i>Nymphalidae</i> Brush-footed Butterflies	G5	S2						50%	Deciduous woodland, riparian woodland, aspen parkland
Species Occurrences verified in these Counties: Carter, Custer, Dawson, Fallon, Liberty, Madison, Powder River, Richland, Toole, Valley										
CADDISFLIES										
<i>Goereilla baumanni</i> Northern Rocky Mountains Refugium Caddisfly	<i>Rossianidae</i> Rossianid Caddisflies	G2	S2					50%	5%	Forested mountain springs
Species Occurrences verified in these Counties: Lake, Missoula State Rank Reason: This NRM Caddisfly is currently ranked a "S2" Species of Concern in MT and at risk because of very limited and/or potentially declining population numbers, range and/or habitat, making it vulnerable to extirpation in the state. Limited sites with small populations and specialized habitats. This species is a rare, endemic caddisfly only found in specific streams in the Pacific Influenced areas of Montana and Idaho (referred to as the Northern Rocky Mountain Refugium).										
<i>Rhyacophila alexanderi</i> Alexander's Rhyacophilan Caddisfly	<i>Rhyacophilidae</i> Primitive Caddisflies	G2	S2					33%	1%	Mountain / alpine streams
Species Occurrences verified in these Counties: Lake, Park State Rank Reason: Alexander's Rhyacophilan Caddisfly is currently ranked a "S2" Species of Concern in MT and at risk because of very limited and/or potentially declining population numbers, range and/or habitat, making it vulnerable to extirpation in the state. Limited sites with small populations, but also difficult to identify without adult specimens.										
<i>Rhyacophila ebria</i> A Rhyacophilan Caddisfly	<i>Rhyacophilidae</i> Primitive Caddisflies	G2G3	S1					50%	1%	Alpine / Mountain streams
Species Occurrences verified in these Counties: Flathead State Rank Reason: This Rhyacophilan Caddisfly is currently ranked a "S1" Species of Concern in MT and is at high risk of extirpation in the state because of very limited and/or potentially declining population numbers, range and/or habitat. Limited sites with small populations, but these insects are also difficult to identify without adult specimens.										
<i>Rhyacophila gemona</i> A Rhyacophilan Caddisfly	<i>Rhyacophilidae</i> Primitive Caddisflies	G2G3	S2					50%	2%	Forested mountain springs
Species Occurrences verified in these Counties: Lake State Rank Reason: This Rhyacophilan Caddisfly is currently ranked a "S2" Species of Concern in MT and at risk because of very limited and/or potentially declining population numbers, range and/or habitat, making it vulnerable to extirpation in the state. Limited sites with small populations, and the species is difficult to identify without adult specimens.										
<i>Rhyacophila glaciera</i> A Rhyacophilan Caddisfly	<i>Rhyacophilidae</i> Primitive Caddisflies	G3	S1					40%	2%	Alpine / Mountain streams
Species Occurrences verified in these Counties: Flathead, Glacier State Rank Reason: This Rhyacophilan Caddisfly is currently ranked a "S1" Species of Concern in MT and is at extreme risk of becoming extirpated in the state because of very limited and/or potentially declining population numbers, range and/or habitat. Limited sites with small populations, retreating glaciers and the difficulty of identifying this species without adult specimens all contribute to its state threatened status.										
<i>Rhyacophila newelli</i> A Rhyacophilan Caddisfly	<i>Rhyacophilidae</i> Primitive Caddisflies	G2	S2					50%	1%	Alpine / Mountain streams

		<p>Species Occurrences verified in these Counties: Missoula State Rank Reason: This Rhyacophilan Caddisfly is currently ranked a "S2" Species of Concern in MT at risk because of very limited and/or potentially declining population numbers, range and/or habitat, making it vulnerable to extirpation in the state. Limited sites with small populations, but also difficult to identify without adult specimens.</p>							
Rhyacophila potteri A Rhyacophilan Caddisfly	Rhyacophilidae Primitive Caddisflies	G3	S2				50%	5%	Forested mountain springs
		<p>Species Occurrences verified in these Counties: Beaverhead, Flathead, Mineral, Ravalli State Rank Reason: This Rhyacophilan Caddisfly is currently ranked a "S2" Species of Concern in MT and at risk because of very limited and/or potentially declining population numbers, range and/or habitat, making it vulnerable to extirpation in the state. Limited sites with small populations, and the species is difficult to identify without adult specimens.</p>							
Rhyacophila rickeri A Rhyacophilan Caddisfly	Rhyacophilidae Primitive Caddisflies	G3G4	S2						Forested mountain springs
		<p>Species Occurrences verified in these Counties: Flathead, Glacier State Rank Reason: This Rhyacophilan Caddisfly is currently ranked a "S2" Species of Concern in MT and at risk because of very limited and/or potentially declining population numbers, range and/or habitat, making it vulnerable to extirpation in the state. Limited sites with small populations, and the species is difficult to identify without adult specimens.</p>							
Rossiana montana Northern Rocky Mountains Refugium Caddisfly	Rossianidae Rossianid Caddisflies	G2G3	S2				50%	1%	Forested mountain springs
		<p>Species Occurrences verified in these Counties: Lake, Mineral, Missoula, Sanders State Rank Reason: This NMR Caddisfly is currently ranked a "S2" Species of Concern in MT and at risk because of very limited and/or potentially declining population numbers, range and/or habitat, making it vulnerable to extirpation in the state. Limited sites with small populations and specialized habitats. This species is a rare, endemic caddisfly only found in specific streams in the Pacific Influenced areas of Montana and Idaho (referred to as the Northern Rocky Mountain Refugium).</p>							
DAMSELFLIES									
Coenagrion interrogatum Subarctic Bluet	Coenagrionidae Narrow-winged Damselflies	G5	S1S2				6%	2%	Wetlands
		<p>Species Occurrences verified in these Counties: Flathead, Lincoln State Rank Reason: This damselfly is currently listed as an "S1S2" Species of Concern in MT due to extremely limited and/or rapidly declining population numbers, range and/or habitat, making it highly vulnerable to extirpation in the state. This restricted range may be due to lack of suitable surveys to detect this dragonfly. With more surveys this species will likely be found in more areas across the western portion of the state. The Subarctic Bluet appears to be very habitat specific to the marshy lakes of northwest MT, limited collecting contributes to it's vulnerable state status as well.</p>							
DRAGONFLIES									
Aeshna subarctica Subarctic Damer	Aeshnidae Damer Dragonflies	G5	S1S2				5%	21%	Forested Wetlands
		<p>Species Occurrences verified in these Counties: Beaverhead, Flathead, Granite, Lake, Lewis and Clark, Lincoln, Missoula, Powell, Sanders State Rank Reason: This dragonfly is currently listed as an "S1S2" Species of Concern in MT due to extremely limited and/or rapidly declining population numbers, range and/or habitat, making it vulnerable to extirpation in the state.</p>							
Erpetogomphus designatus Eastern Ringtail	Gomphidae Clubtail Dragonflies	G5	S1				5%	2%	Large prairie rivers, warm springs
		<p>Species Occurrences verified in these Counties: Blaine, Phillips State Rank Reason: This dragonfly is currently listed as an "S1" Species of Concern in MT due to extremely limited and/or rapidly declining population numbers, range and/or habitat, making it highly vulnerable to extirpation in the state. It has only been reported from a large warm springs pond in eastern Montana.</p>							
Erythemis collocata Western Pondhawk	Libellulidae Skimmer Dragonflies	G5	S1S2				5%	6%	Wetlands
		<p>Species Occurrences verified in these Counties: Jefferson, Madison State Rank Reason: This dragonfly is currently listed as an "S1S2" Species of Concern in MT due to extremely limited and/or rapidly declining population numbers, range and/or habitat, making it highly vulnerable to extirpation in the state. Restricted to one warm spring habitat in the Tobacco Root Mountains of the state.</p>							
Leucorrhinia borealis Boreal Whiteface	Libellulidae Skimmer Dragonflies	G5	S1				10%	36%	Wetlands and Ponds
		<p>Species Occurrences verified in these Counties: Beaverhead, Deer Lodge, Jefferson, Lewis and Clark, Powell, Silver Bow State Rank Reason: This dragonfly is currently listed as an "S1" Species of Concern in MT due to extremely limited and/or rapidly declining population numbers, range and/or habitat, making it highly vulnerable to extirpation in the state. This restricted range may be due to lack of suitable surveys to detect this dragonfly. With more surveys this species will likely be found in more areas across the western portion of the state.</p>							
Somatochlora walshii Brush-tipped Emerald	Corduliidae Emerald Dragonflies	G5	S1S2				5%	9%	Forested Wetlands
		<p>Species Occurrences verified in these Counties: Flathead, Lake, Lewis and Clark, Lincoln, Missoula, Powell State Rank Reason: This dragonfly is currently listed as an "S1S2" Species of Concern in MT due to extremely limited and/or rapidly declining population numbers, range and/or habitat, making it highly vulnerable to extirpation in the state.</p>							
Stylurus intricatus Brimstone Clubtail	Gomphidae Clubtail Dragonflies	G4	S1				10%	54%	Large prairie rivers
		<p>Species Occurrences verified in these Counties: Powder River, Prairie, Richland, Roosevelt State Rank Reason: This dragonfly is currently listed as an "S1" Species of Concern in MT due to extremely limited and/or rapidly declining population numbers, range and/or habitat, making it highly vulnerable to extirpation in the state. Currently only known from a few locations, mostly from larval collections and require shifting prairie river sandbars, this habitat is lost when damming a large river occurs.</p>							
MAYFLIES									
Aneporus rusticus A Sand-dwelling Mayfly	Heptageniidae Heptageniid Mayflies	G2	S1				50%	2%	Large prairie rivers
		<p>Species Occurrences verified in these Counties: Custer, Powder River, Prairie State Rank Reason: This sand-dwelling mayfly is currently listed as "S1" Species of Concern in MT due to extremely limited and/or rapidly declining population numbers, range and/or habitat, making it highly vulnerable to extirpation in the state. This large river species has probably lost miles of habitat due to dams on the Milk, Tongue, Bighorn, and Missouri Rivers. This species is limited by intact large, prairie river habitat and potentially may be threatened by coal bed natural gas (CBNG) development in the Powder River basin of Wyoming (Stagliano 2012).</p>							

Caurinella idahoensis Lolo Mayfly	Ephemereleididae Ephemereleidid Mayflies	G3	S2				50%	5%	Small forested mountain streams
Species Occurrences verified in these Counties: Mineral, Missoula, Sanders State Rank Reason: This Lolo mayfly is currently ranked "S2" in Montana, because it is at risk of extirpation in the state due to very limited and/or potentially declining population numbers, range and/or habitat. This species is a rare, endemic mayfly only found in specific streams in the Pacific influenced areas of Montana and Idaho (referred to as the Northern Rocky Mountain Refugium).									
Homooneuria alleni A Sand-dwelling Mayfly	Oligoneuriidae Oligoneurid Mayflies	G4	S2				20%	5%	Large prairie rivers
Species Occurrences verified in these Counties: Custer, Powder River, Richland State Rank Reason: This sand-dwelling mayfly is currently ranked "S2" in Montana, because it is at risk of extirpation in the state due to very limited and/or potentially declining population numbers, range and/or habitat.									
Lachlania saskatchewanensis A Sand-dwelling Mayfly	Oligoneuriidae Oligoneurid Mayflies	G4	S1				33%	5%	Large prairie rivers
Species Occurrences verified in these Counties: Dawson, Hill, Powder River, Richland State Rank Reason: This sand-dwelling mayfly is currently listed as "S1" Species of Concern in MT due to extremely limited and/or rapidly declining population numbers, range and/or habitat, making it highly vulnerable to extirpation in the state. This large river species has probably lost miles of habitat due to dams on the Milk, Tongue, Bighorn, and Missouri Rivers.									
Macdunnoa nipawinia A Sand-dwelling Mayfly	Heptageniidae Heptageniid Mayflies	G3	S2				33%	5%	Large prairie rivers
Species Occurrences verified in these Counties: Richland State Rank Reason: This sand-dwelling mayfly is currently listed as an "S2" species of concern in Montana because they are potentially at risk of extirpation in the state, due to limited and/or declining numbers, range and/or habitat, even though it may be abundant in some areas.									
Parameletus columbiae A Mayfly	Siphonuridae Siphonurid Mayflies	G2	S1						Wetlands and Ponds
Species Occurrences verified in these Counties: Flathead, Glacier State Rank Reason: This mayfly is currently listed as an "S1" Species of Concern in MT due to extremely limited and/or rapidly declining population numbers, range and/or habitat, making it highly vulnerable to global extinction or extirpation in the state. Recently discovered in limited wetland locations with the Flathead River basin and Glacier Park.									
Raptoheptagenia cruentata A Mayfly	Heptageniidae Heptageniid Mayflies	G4	S2			SENSITIVE	50%	5%	Large prairie rivers
Species Occurrences verified in these Counties: Custer, Powder River State Rank Reason: This mayfly is currently listed as an "S2" species of concern in Montana because they are potentially at risk of extirpation in the state, due to limited and/or declining numbers, range and/or habitat, even though it may be abundant in some areas. This species is limited by intact large, prairie river habitat and potentially may be threatened by coal bed natural gas (CBNG) development in the Powder River basin of Wyoming (Stagliano 2012).									
SPRINGTAILS									
Oncopodura cruciata A Springtail	Oncopoduridae Elongate Springtails	G1G2	S1S2				100%	1%	Caves
Species Occurrences verified in these Counties: Jefferson									
STONEFLIES									
Isocapnia crinita Hooked Snowfly	Capniidae Small Winter Stoneflies	G5	S2				20%	9%	Mountain Streams to Rivers
Species Occurrences verified in these Counties: Flathead, Gallatin, Lincoln, Missoula, Ravalli State Rank Reason: The Hooked Snowfly is currently ranked "S2" in Montana because it was thought to be at risk due to very limited and/or potentially declining population numbers, range and/or habitat, making it vulnerable to extirpation in the state. But, recent range extensions due to newly reported collections may warrant re-evaluating this SOC rank.									
Isocapnia integra Alberta Snowfly	Capniidae Small Winter Stoneflies	G4	S2				20%	5%	Mountain Streams to Rivers
Species Occurrences verified in these Counties: Broadwater, Carbon, Cascade, Flathead, Gallatin, Lincoln, Mineral, Park, Stillwater, Sweet Grass, Yellowstone State Rank Reason: The Alberta snowfly is currently ranked "S2" in Montana because it was thought to be at risk due to very limited and/or potentially declining population numbers, range and/or habitat, making it vulnerable to extirpation in the state. But, recent range extensions due to taxonomic changes may warrant re-evaluating this SOC rank.									
Isoperla petersoni Springs Stripetail	Perlodidae Perlodid Stoneflies	G5	S2				10%	9%	Alpine / Mountain streams
Species Occurrences verified in these Counties: Gallatin, Glacier State Rank Reason: The Springs Stripetail is currently ranked a "S2" Species of Concern in MT at risk because of very limited and/or potentially declining population numbers, range and/or habitat, making it vulnerable to extirpation in the state. Limited sites with small populations, but also difficult to identify without adult specimens.									
Lednia tumana Meltwater Lednian Stonefly	Nemouridae Spring Stoneflies	G1G2	S1	P	Candidate on Forests (FLAT)		100%	1%	Alpine streams
Species Occurrences verified in these Counties: Flathead, Glacier, Lake State Rank Reason: This stonefly is currently listed as an "S1" Species of Concern in MT due to extremely limited and/or rapidly declining population numbers, range and/or habitat, making it highly vulnerable to extirpation in the state or even global extinction. Currently only known from a few locations in Glacier National Park, mostly from larval collections. Currently at risk of becoming extinct due to the melting of the glaciers in Glacier National Park, which it depends on for its alpine snow-melt stream habitat. It was listed as a "candidate species" for listing under the Endangered Species Act. in 2011.									
Soliperla salish Clearwater Roachfly	Peltoperlidae Roachlike Stoneflies	G2	S2				50%	1%	Small forested mountain streams
Species Occurrences verified in these Counties: Mineral, Sanders State Rank Reason: The Clearwater Roachfly is currently ranked a "S2" Species of Concern in MT at risk because of very limited and/or potentially declining population numbers, range and/or habitat, making it vulnerable to extirpation in the state.									

Soyedina potteri Northern Rocky Mountains Refugium Stonefly	Nemouridae Spring Stoneflies	G2	S2					33%	5%	Small forested mountain streams
		Species Occurrences verified in these Counties: Flathead, Glacier, Mineral, Missoula, Sanders State Rank Reason: The NRWR stonefly is currently ranked "S2" in Montana because it is thought to be at risk due to very limited and/or potentially declining population numbers, range and/or habitat, making it vulnerable to extirpation in the state. This species is globally restricted to Montana and Idaho.								
Utacapnia columbiana Columbian Snowfly	Capniidae Small Winter Stoneflies	G5	S2					20%	2%	Mountain Streams to Rivers
		Species Occurrences verified in these Counties: Lincoln State Rank Reason: The Columbian Snowfly is currently ranked "S2" in Montana because it was thought to be at risk due to very limited and/or potentially declining population numbers, range and/or habitat, making it vulnerable to extirpation in the state.								
Zapada cordillera Cordilleran Forestfly	Nemouridae Spring Stoneflies	G3	S2					33%	17%	Alpine / Mountain streams
		Species Occurrences verified in these Counties: Flathead, Lake, Missoula State Rank Reason: The Cordilleran stonefly is currently ranked "S2" in Montana because it is thought to be at risk due to very limited and/or potentially declining population numbers, range and/or habitat, making it vulnerable to extirpation in the state. Occurrences in the Northern Rocky Mountain region (Montana and Idaho) appear to be disjunct glacial refugium populations (Gustafson 2001).								
Zapada glacier Western Glacier Stonefly	Nemouridae Spring Stoneflies	G1	S1	P				40%	1%	Alpine streams
		Species Occurrences verified in these Counties: Carbon, Flathead, Glacier State Rank Reason: The Western Glacier stonefly is currently ranked "S1" in Montana because it is thought to be at high risk due to very limited and/or potentially declining population numbers, range and/or habitat, making it extremely vulnerable to extirpation in the state. This species is particularly vulnerable due to its very restricted habitat and cold water temperature requirements.								

INVERTEBRATES - MOLLUSKS										29 SPECIES
SCIENTIFIC NAME COMMON NAME TAXA SORT	FAMILY (SCIENTIFIC) FAMILY (COMMON)	GLOBAL RANK	STATE RANK	USFWS	USFS	BLM	FWP SWAP	% OF GLOBAL BREEDING RANGE IN MT	% OF MT THAT IS BREEDING RANGE	HABITAT
Acroloxus coloradensis Rocky Mountain Capshell	Acroloxiidae Capshells	G3G4	S1					20%	1%	High Elevation Lakes
		Species Occurrences verified in these Counties: Flathead, Glacier State Rank Reason: Due to this restricted distribution and only a few known occurrences, this species was placed on the MT Species of Concern list as S1, critically imperiled. It is at high risk of extirpation in the state because of very limited and/or potentially declining population numbers, range and/or habitat.								
Colligyrus greggi Rocky Mountain Dusksnail	Hydrobiidae Arnicolas / Dusksnails	G4	S1					20%	5%	Springs, cold mountain streams
		Species Occurrences verified in these Counties: State Rank Reason: Due to this restricted distribution and few known occurrences, this species has been placed on the MT Species of Concern list as S1, critically imperiled and extremely vulnerable to extirpation in the state. Only a few occurrences known despite extensive sampling in its preferred habitats in the past few years; restrictive spring-influenced habitats.								
Cryptomastix sanburni Kingston Oregonian	Polygyridae Oregonians / Forest Snails	G1	S1							Mesic/moist conifer forests
		Species Occurrences verified in these Counties: Missoula								
Discus brunsoni Lake Disc	Discidae Discs	G1	S1					100%	1%	Talus, mesic conifer forests

Margaritifera falcata Western Pearshell	Margaritiferidae Margaritiferid Mussels	G5	S2		Sensitive - Known on Forests (BD, BRT, CG, HLC, KOOT, LOLO) Sensitive - Suspected on Forests (FLAT)	SENSITIVE	SGCN2	10%	26%	Mountain streams, rivers
		Species Occurrences verified in these Counties: Beaverhead, Broadwater, Cascade, Deer Lodge, Gallatin, Granite, Jefferson, Lake, Lewis and Clark, Lincoln, Madison, Meagher, Missoula, Powell, Ravalli, Sanders, Silver Bow State Rank Reason: The Western Pearshell is currently ranked a "S2" Species of Concern in MT and is at risk because of very limited and/or potentially declining population numbers, range and/or habitat, making it vulnerable to extirpation in the state. This species is widespread in geographic area, but is declining in terms of area occupied and the number of sites with viable individuals; populations showing repeated reproduction (at least several age classes) are now the exception rather than the rule. Montana currently has only 14 "excellent" viable populations out of ~200 known locations (Stagliano 2010). Short term trends show populations declining by ~20% over the last decade (Stagliano 2015).

ARACHNIDS										
Sclerobunus cavicolens A Cave Obligate Harvestman	Triaeonychidae Daddy Longlegs / Harvestmen	G1G2	S1S2					100%	1%	Caves
Species Occurrences verified in these Counties: Jefferson, Madison										
CRUSTACEANS										
Salmasellus steganothrix A Cave Obligate Isopod	Asellidae Pill / Sow Bugs	G2G3	S1S2					70%	1%	Cave springs
Species Occurrences verified in these Counties: Flathead State Rank Reason: This Subterranean Cave Obligate Isopod is currently listed as "S1S2" in MT due to extremely limited and/or rapidly declining population numbers, range and/or habitat, making it highly vulnerable to global extinction or extirpation in the state. These subterranean isopods are generally endemic to only a few locations; this one having only been reported in Montana from Algal Cave in Glacier National Park, and the subterranean alluvial floodplain between the Flathead and Whitefish rivers in the Kalispell Valley, both in Flathead County.										
Stygobromus glacialis Glacier Amphipod	Crangonyctidae Gammarid Amphipods	G1G3	S1S2					100%	1%	Subterranean Aquatic Ecosystems
Species Occurrences verified in these Counties: Flathead, Glacier State Rank Reason: This Subterranean Amphipod is currently listed as "S1S2" in MT due to extremely limited and/or rapidly declining population numbers, range and/or habitat, making it highly vulnerable to global extinction or extirpation in the state. These subterranean amphipods are generally endemic to a few locations.										
Stygobromus montanensis A Subterranean Amphipod	Crangonyctidae Gammarid Amphipods	G1G2	S1S2					100%	1%	Subterranean Aquatic Ecosystems
Species Occurrences verified in these Counties: Ravalli State Rank Reason: This Subterranean Amphipod is currently listed as "S1S2" in MT due to extremely limited and/or rapidly declining population numbers, range and/or habitat, making it highly vulnerable to global extinction or extirpation in the state. These subterranean amphipods are generally endemic to a few locations.										
Stygobromus obscurus A Subterranean Amphipod	Crangonyctidae Gammarid Amphipods	G1G2	S1S2					100%	1%	Subterranean Aquatic Ecosystems
Species Occurrences verified in these Counties: Ravalli State Rank Reason: This Subterranean Amphipod is currently listed as "S1S2" in MT due to extremely limited and/or rapidly declining population numbers, range and/or habitat, making it highly vulnerable to global extinction or extirpation in the state. These subterranean amphipods are generally endemic to a few locations.										
Stygobromus puteanus A Subterranean Amphipod	Crangonyctidae Gammarid Amphipods	G1G2	S1S2					100%	1%	Subterranean Aquatic Ecosystems
Species Occurrences verified in these Counties: Broadwater, Gallatin State Rank Reason: This Subterranean Amphipod is currently listed as "S1S2" in MT due to extremely limited and/or rapidly declining population numbers, range and/or habitat, making it highly vulnerable to global extinction or extirpation in the state. These subterranean amphipods are generally endemic to a few locations.										
Stygobromus tritus A Subterranean Amphipod	Crangonyctidae Gammarid Amphipods	G1G2	S1S2					100%	1%	Subterranean Aquatic Ecosystems

Species Occurrences verified in these Counties: Missoula, Ravalli
 State Rank Reason: This Subterranean Amphipod is currently listed as "S1S2" in MT due to extremely limited and/or rapidly declining population numbers, range and/or habitat, making it highly vulnerable to global extinction or extirpation in the state. These subterranean amphipods are generally endemic to a few locations.

FRESHWATER SPONGES										
Ephydatia cooperensis A Freshwater Sponge	Spongillidae Spongillid Sponges	G1G3	S1S3					100%	1%	Lakes
		Species Occurrences verified in these Counties: Missoula, Powell State Rank Reason: This Freshwater Sponge is currently ranked a "S1S3" Species of Concern in MT and is at risk because of very limited and/or potentially declining population numbers, range and/or habitat, making it vulnerable to extirpation in the state. Known from a few locations in lakes of northwest Montana.								
MILLIPEDES										
Adrietyla cucullata A Millipede	Adrietylidae Adrietylid Millipedes	G1G3	S1S3							Dry mixed conifer forest clearings
		Species Occurrences verified in these Counties: Missoula								
Austrotyla montani A Millipede	Conotylidae Conotylid Millipedes	G1G3	S1S3							Mixed conifer forests
		Species Occurrences verified in these Counties: Missoula								
Corypus cochlearis A Millipede	Conotylidae Conotylid Millipedes	G1G3	S1S3							Mixed conifer forests
		Species Occurrences verified in these Counties: Missoula, Sanders								
Endopus parvipes A Millipede	Conotylidae Conotylid Millipedes	G1G3	S1S3							Subalpine mixed conifer forests
		Species Occurrences verified in these Counties: Lake								
Lophomus laxus A Millipede	Conotylidae Conotylid Millipedes	G1G3	S1S3							Mixed conifer forests
		Species Occurrences verified in these Counties: Granite, Lake, Missoula, Ravalli								
Orophe cabinetus A Millipede	Xystodesmidae Xystodesmid Millipedes	G1G3	S1S3							Moist mixed conifer forests
		Species Occurrences verified in these Counties: Lake, Mineral, Sanders								
Orthogmus oculatus A Millipede	Conotylidae Conotylid Millipedes	G1G3	S1S3							Mixed conifer forests
		Species Occurrences verified in these Counties: Sanders								
Taiyutyla curvata A Millipede	Conotylidae Conotylid Millipedes	G1G3	S1S3							Moist mixed conifer forests
		Species Occurrences verified in these Counties: Lincoln								

Potential Species of Concern

94 Species

All Records (no filtering)

MAMMALS (MAMMALIA)										15 SPECIES
SCIENTIFIC NAME COMMON NAME TAXA SORT	FAMILY (SCIENTIFIC) FAMILY (COMMON)	GLOBAL RANK	STATE RANK	USFWS	USFS	BLM	FWP SWAP	% OF GLOBAL BREEDING RANGE IN MT	% OF MT THAT IS BREEDING RANGE	HABITAT
Chaetodipus hispidus Hispid Pocket Mouse	Heteromyidae Pocket Mice / Kangaroo Rats	G5	SU				SGIN	1%	2%	Mixed grassland dry forest
Species Occurrences verified in these Counties:										
Erethizon dorsatum Porcupine	Erethizontidae Porcupines	G5	S4				SGIN	3%	100%	Mixed forest
Species Occurrences verified in these Counties: State Rank Reason: Although commonly observed and presumably secure in eastern Montana, this species has undergone significant and possibly catastrophic declines in conifer forests west of the Continental Divide. The cause of these declines is unknown, and there is considerable uncertainty what effect this will have on the persistence of the species within this region of the state.										
Lasiorycteris noctivagans Silver-haired Bat	Vespertilionidae Bats	G3G4	S4					4%	100%	Riparian and forest
Species Occurrences verified in these Counties:										
Lepus californicus Black-tailed Jack Rabbit	Leporidae Rabbits	G5	SU				SGIN	1%	3%	Sagebrush grassland
Species Occurrences verified in these Counties:										
Marmota caligata Hoary Marmot	Sciuridae Squirrels	G5	S3S4				SGIN	4%	19%	Alpine / Subalpine slopes
Species Occurrences verified in these Counties:										
Microtus richardsoni Water Vole	Cricetidae New World Mice / Rats / Voles	G5	S4					17%	34%	Alpine and subalpine aquatic habitats
Species Occurrences verified in these Counties:										
Myotis yumanensis Yuma Myotis	Vespertilionidae Bats	G5	S3				SGIN	4%	0%	Riparian and mixed forest
Species Occurrences verified in these Counties: State Rank Reason: In Montana populations of this species are believed to be stable. However, the threat of catastrophic decline from White-Nose Syndrome, a fungal disease of bats responsible for the deaths of millions of individuals of closely related species in other areas, presents a treat of substantial declines within the state. Recent observations from Washington have confirmed the susceptibility of this species to WNS infection.										
Peromyscus leucopus White-footed Mouse	Cricetidae New World Mice / Rats / Voles	G5	S4					2%	58%	Riparian shrub
Species Occurrences verified in these Counties:										
Sorex haydeni Hayden's Shrew	Soricidae Shrews	G5	S3S4					5%	65%	Grasslands
Species Occurrences verified in these Counties: State Rank Reason: Species faces threats from development and degradation of native prairie habitats. Species is infrequently observed, so it is difficult to assess threats and trends.										
Spilogale gracilis Western Spotted Skunk	Mephitidae Skunks	G5	SU				SGIN	1%	22%	Riparian shrub
Species Occurrences verified in these Counties:										
Tamias umbrinus Uinta Chipmunk	Sciuridae Squirrels	G5	SU				SGIN	1%	8%	High elevation conifer forest
Species Occurrences verified in these Counties:										
Thomomys idahoensis Idaho Pocket Gopher	Geomysidae Pocket Gophers	G4	S2S4				SGIN	33%	6%	Open habitat / generalist
Species Occurrences verified in these Counties:										
Urocitellus armatus Uinta Ground Squirrel	Sciuridae Squirrels	G5	S3S4				SGIN	14%	8%	Open grassy edges
Species Occurrences verified in these Counties: State Rank Reason: Due to infrequent observations distribution, threats, and status are uncertain within the state.										
Urocitellus elegans Wyoming Ground Squirrel	Sciuridae Squirrels	G5	S3S4					23%	9%	Open habitat / sage grasslands / montane meadows
Species Occurrences verified in these Counties: State Rank Reason: Due to infrequent observations distribution, threats, and status are uncertain within the state.										
Zapus hudsonius Meadow Jumping Mouse	Dipodidae Jumping Mice	G5	SU				SGIN	1%	20%	Riparian and moist grassland
Species Occurrences verified in these Counties:										

BIRDS (AVES)										17 SPECIES
SCIENTIFIC NAME COMMON NAME TAXA SORT	FAMILY (SCIENTIFIC) FAMILY (COMMON)	GLOBAL RANK	STATE RANK	USFWS	USFS	BLM	FWP SWAP	% OF GLOBAL BREEDING RANGE IN MT	% OF MT THAT IS BREEDING RANGE	HABITAT
Aegolius funereus Boreal Owl	Strigidae Owls	G5	S3S4	MBTA			SGIN	2%	39%	Conifer forest
Species Occurrences verified in these Counties: State Rank Reason: Very little is known about population size or population trends and there is concern over the impacts of forest disease, fire, and timber harvest because the species is dependent on mature spruce/fir forests.										
Asio flammeus Short-eared Owl	Strigidae Owls	G5	S4	MBTA; BCC11; BCC17				2%	100%	Grasslands
Species Occurrences verified in these Counties:										
Bucephala islandica Barrow's Goldeneye	Anatidae Swans / Geese / Ducks	G5	S4	MBTA			SGIN	2%	31%	Mountain Lakes and Wetlands
Species Occurrences verified in these Counties:										
Chaetura pelagica Chimney Swift	Apodidae Swifts	G4G5	S3S4B	MBTA			SGIN	1%	59%	Chimneys, caves, hollow trees
Species Occurrences verified in these Counties:										
Lophodytes cucullatus Hooded Merganser	Anatidae Swans / Geese / Ducks	G5	S4	MBTA			SGIN	2%	100%	Rivers, Riparian/Wetland
Species Occurrences verified in these Counties:										
Megascops asio Eastern Screech-Owl	Strigidae Owls	G5	S3S4	MBTA				4%	74%	Riparian forest
Species Occurrences verified in these Counties:										
Megascops kennicottii Western Screech-Owl	Strigidae Owls	G4G5	S3S4	MBTA			SGIN	3%	34%	Riparian forest
Species Occurrences verified in these Counties: State Rank Reason: Species lacks baseline assessment and monitoring data. The species may face threats to mature forest nest sites in riparian areas due to development, altered hydrology, and grazing, but how operational these threats are is uncertain. Thus, the species is most appropriately placed on the Potential Species of Concern list with a state conservation status rank of S3S4 until more information is available.										
Mniotilta varia Black-and-white Warbler	Parulidae Warblers	G5	S4B	MBTA				1%	27%	Deciduous forest
Species Occurrences verified in these Counties:										
Oreothlypis peregrina Tennessee Warbler	Parulidae Warblers	G5	S3S4B	MBTA				1%	11%	Forest wetland
Species Occurrences verified in these Counties:										
Phalaenoptilus nuttallii Common Poorwill	Caprimulgidae Nightjars	G5	S4B	MBTA			SGIN	4%	100%	Shrub grassland
Species Occurrences verified in these Counties: State Rank Reason: Although species lacks monitoring data, populations are assumed to be stable, habitats seem to be intact, and threats are not believed to be significant at the present time.										
Seiurus aurocapilla Ovenbird	Parulidae Warblers	G5	S4B	MBTA				5%	75%	Deciduous forest
Species Occurrences verified in these Counties:										
Selasphorus platycercus Broad-tailed Hummingbird	Trochilidae Hummingbirds	G5	S4B	MBTA			SGIN	1%	5%	Montane shrublands / woodlands
Species Occurrences verified in these Counties:										
Selasphorus rufus Rufous Hummingbird	Trochilidae Hummingbirds	G5	S4B	MBTA				9%	45%	Riparian shrub
Species Occurrences verified in these Counties:										
Sialia sialis Eastern Bluebird	Turdidae Thrushes	G5	S4B	MBTA				1%	35%	Prairie woodlands
Species Occurrences verified in these Counties:										
Spiza americana Dickcissel	Cardinalidae Tanagers / Cardinals / Buntings	G5	S4B	MBTA; BCC11; BCC17				3%	45%	Grasslands
Species Occurrences verified in these Counties:										
Tyrannus vociferans Cassin's Kingbird	Tyrannidae Flycatchers	G5	S4B	MBTA				1%	26%	Riparian forest
Species Occurrences verified in these Counties:										
Vireo plumbeus Plumbeous Vireo	Vireonidae Vireos	G5	S3S4B	MBTA				1%	31%	Conifer forest
Species Occurrences verified in these Counties:										

REPTILES (REPTILIA)										1 SPECIES
SCIENTIFIC NAME COMMON NAME TAXA SORT	FAMILY (SCIENTIFIC) FAMILY (COMMON)	GLOBAL RANK	STATE RANK	USFWS	USFS	BLM	FWP SWAP	% OF GLOBAL BREEDING RANGE IN MT	% OF MT THAT IS BREEDING RANGE	HABITAT
<i>Phrynosoma douglasii</i> Pygmy Short-horned Lizard	<i>Phrynosomatidae</i> Sagebrush / Spiny Lizards	G5	SU				SGIN			Sandy/gravelly soils in grassland and shrubland

FISH (ACTINOPTERYGII)										5 SPECIES
SCIENTIFIC NAME COMMON NAME TAXA SORT	FAMILY (SCIENTIFIC) FAMILY (COMMON)	GLOBAL RANK	STATE RANK	USFWS	USFS	BLM	FWP SWAP	% OF GLOBAL BREEDING RANGE IN MT	% OF MT THAT IS BREEDING RANGE	HABITAT
<i>Culaea inconstans</i> Brook Stickleback	<i>Gasterosteidae</i> Sticklebacks	G5	S4						27%	Small prairie rivers
Species Occurrences verified in these Counties: State Rank Reason: The brook stickleback is currently ranked an S4 in Montana and is considered a potential species of concern. While this species is apparently secure, it may be quite rare in parts of its range, and/or suspected to be declining.										
<i>Hybognathus hankinsoni</i> Brassy Minnow	<i>Cyprinidae</i> Minnows	G5	S4					6%	26%	Small prairie rivers
Species Occurrences verified in these Counties: State Rank Reason: The brassy minnow is currently ranked an S4 in Montana and is considered a potential species of concern. While this species is apparently secure, it may be quite rare in parts of its range, and/or suspected to be declining.										
<i>Hybognathus placitus</i> Plains Minnow	<i>Cyprinidae</i> Minnows	G4	S4					10%	8%	Small and large prairie rivers
Species Occurrences verified in these Counties: State Rank Reason: The plains minnow is currently ranked an S4 in Montana and is considered a potential species of concern. While this species is apparently secure, it may be quite rare in parts of its range, and/or suspected to be declining.										
<i>Lota lota</i> Burbot	<i>Gadidae</i> Burbot	G5	S4					1%	20%	Large rivers, lakes
Species Occurrences verified in these Counties: State Rank Reason: The burbot is currently ranked an S4 in Montana and is considered a potential species of concern. While this species is apparently secure, it may be quite rare in parts of its range, and/or suspected to be declining.										
<i>Semotilus atromaculatus</i> Creek Chub	<i>Cyprinidae</i> Minnows	G5	S4					1%	17%	Small prairie rivers
Species Occurrences verified in these Counties: State Rank Reason: The creek chub is currently ranked an S4 in Montana and is considered a potential species of concern. While this species is apparently secure, it may be quite rare in parts of its range, and/or suspected to be declining.										

INVERTEBRATES - INSECTS										51 SPECIES
SCIENTIFIC NAME COMMON NAME TAXA SORT	FAMILY (SCIENTIFIC) FAMILY (COMMON)	GLOBAL RANK	STATE RANK	USFWS	USFS	BLM	FWP SWAP	% OF GLOBAL BREEDING RANGE IN MT	% OF MT THAT IS BREEDING RANGE	HABITAT
<i>Grylloblatta campodeiformis</i> Northern Rock Crawler	<i>Grylloblattidae</i> Ice Crawlers	GNR	S3S4							
Species Occurrences verified in these Counties: State Rank Reason: Only a few records are known from the state, but this is probably due to them being mostly nocturnal and active at temperatures just above freezing.										
BETLES										
<i>Cicindela limbata</i> Sandy Tiger Beetle	<i>Cicindelidae</i> Tiger Beetles	G4G5	S3							Sandy beaches
Species Occurrences verified in these Counties:										
BUTTERFLIES										
<i>Apodemia mormo</i> Mormon Metalmark	<i>Riodinidae</i> Metalmark Butterflies	G5	S3S5						37%	Sagebrush / grassland
Species Occurrences verified in these Counties:

Species Occurrences verified in these Counties:										
CADDISFLIES										
Agapetus montanus An Agapetus Caddisfly	Glossosomatidae Glossosomatid Caddisflies	G3	S3					25%	39%	Valley / mountain forested streams
Species Occurrences verified in these Counties:										
State Rank Reason: This Glossosomatid Caddisfly is currently ranked a "S3" Potential Species of Concern in MT and is potentially at risk because of limited and/or potentially declining population numbers, range and/or habitat, making it vulnerable. This species was ranked a species of concern in 2006, but additional occurrence records and range expansions has moved it to the Potential Species of Concern list.										
Rhyacophila oreia A Rhyacophilan Caddisfly	Rhyacophilidae Primitive Caddisflies	G1G3	SU							Mountain Springs
Species Occurrences verified in these Counties:										
State Rank Reason: This Rhyacophilan Caddisfly is currently ranked a "SNR" a Potential Species of Concern in MT and at risk because of very limited and/or potentially declining population numbers, range and/or habitat, making it vulnerable to extirpation in the state. Limited sites with small populations, and the species is difficult to identify without adult specimens. Only 2 records for Montana										
Sericostriata surdickae Northern Rocky Mountains Refugium Caddisfly	Uenoidae Uenoid Caddisflies	G3	S3					33%	5%	Small forested mountain streams
Species Occurrences verified in these Counties:										
State Rank Reason: This Northern Rocky Mountains Refugium Caddisfly is currently ranked a "S3" Potential Species of Concern in MT and is potentially at risk because of limited and/or potentially declining population numbers, range and/or habitat, making it vulnerable. This species was ranked a species of concern in 2006, but additional occurrence records and range expansions has moved it to the Potential Species of Concern list.										
DAMSELFLIES										
Argia alberta Paiute Dancer	Coenagrionidae Narrow-winged Damselflies	G4	S2S3					64%		Springs/Ponded Springs
Species Occurrences verified in these Counties:										
State Rank Reason: The Paiute Dancer damselfly is currently listed as an "S2S3" species of potential concern in Montana because they are potentially at risk because of limited and/or declining numbers, range and/or habitat, even though it may be abundant in some areas.										
Argia emma Emma's Dancer	Coenagrionidae Narrow-winged Damselflies	G5	S3S5					74%		Streams and Rivers
Species Occurrences verified in these Counties:										
State Rank Reason: Emma's Dancer damselfly is currently listed as an "S3S5" species of potential concern in Montana because they are potentially at risk because of limited and/or declining numbers, range and/or habitat, even though it may be abundant in some areas.										

Argia vivida Vivid Dancer	Coenagrionidae Narrow-winged Damselflies	G5	S3S5				13%	89%	Streams and Rivers
Species Occurrences verified in these Counties:									
Coenagrion angulatum Prairie Bluet	Coenagrionidae Narrow-winged Damselflies	G5	S1S3				16%	32%	Small prairie streams / wetlands
Species Occurrences verified in these Counties: State Rank Reason: The Prairie Bluet damselfly is currently listed as an "S1S3" species of potential concern in Montana because they are potentially at risk because of limited and/or declining numbers, range and/or habitat, even though it may be abundant in some areas. This rank is based on limited collections, but is probably more widespread than the rank implies.									
Enallagma civile Familiar Bluet	Coenagrionidae Narrow-winged Damselflies	G5	S2S4					45%	Wetlands / lakes with emergent veg
Species Occurrences verified in these Counties: State Rank Reason: The Familiar Bluet damselfly is currently listed as an "S2S4" species of potential concern in Montana because they are potentially at risk because of limited and/or declining numbers, range and/or habitat, even though it may be abundant in some areas. This rank is based on limited collections, but is probably more widespread than the rank implies.									
Enallagma clausum Alkali Bluet	Coenagrionidae Narrow-winged Damselflies	G5	S2S4				17%	81%	Prairie streams / wetlands
Species Occurrences verified in these Counties: State Rank Reason: The Alkali Bluet damselfly is currently listed as an "S2S4" species of potential concern in Montana because they are potentially at risk because of limited and/or declining numbers, range and/or habitat, even though it may be abundant in some areas. This rank is based on limited collections, but is probably more widespread than the rank implies.									
Enallagma praevarum Arroyo Bluet	Coenagrionidae Narrow-winged Damselflies	G5	S3S5					42%	Prairie streams / wetlands
Species Occurrences verified in these Counties: State Rank Reason: The Arroyo Bluet damselfly is currently listed as an "S3S5" species of potential concern in Montana because they are potentially at risk because of limited and/or declining numbers, range and/or habitat, even though it may be abundant in some areas. This rank was based on limited collections, but this species is more widespread than the rank implies.									
DRAGONFLIES									
Aeshna constricta Lance-tipped Darner	Aeshnidae Darner Dragonflies	G5	S1S3					100%	Wetlands / lakes with emergent veg
Species Occurrences verified in these Counties: State Rank Reason: The Lance-tipped Darner is currently ranked S1S3 as a "potential species of concern" in Montana because it is potentially at risk of extirpation in the state due to limited and/or declining numbers, range and/or habitat, even though it may be abundant in some areas.									
Aeshna eremita Lake Darner	Aeshnidae Darner Dragonflies	G5	S3S4					45%	Wetlands / lakes with emergent veg
Species Occurrences verified in these Counties: State Rank Reason: The Lake Darner is currently ranked S3S4 as a "potential species of concern" in Montana because it is potentially at risk of extirpation in the state due to limited and/or declining numbers, range and/or habitat, even though it may be abundant in some areas.									
Aeshna juncea Sedge Darner	Aeshnidae Darner Dragonflies	G5	S3S5					32%	Wetlands
Species Occurrences verified in these Counties: State Rank Reason: The Sedge Darner is currently ranked S3S5 as a "potential species of concern" in Montana because it is potentially at risk of extirpation in the state, due to limited and/or declining numbers, range and/or habitat, even though it may be abundant in some areas.									
Aeshna sitchensis Zigzag Darner	Aeshnidae Darner Dragonflies	G5	S2S3					32%	Wetlands
Species Occurrences verified in these Counties: State Rank Reason: The Zigzag Darner is currently ranked S2S3 as a "potential species of concern" in Montana because it is potentially at risk of extirpation in the state, due to limited and/or declining numbers, range and/or habitat, even though it may be abundant in some areas.									
Aeshna tuberculifera Black-tipped Darner	Aeshnidae Darner Dragonflies	G5	S2S4					17%	Wetlands / lakes with emergent veg
Species Occurrences verified in these Counties: State Rank Reason: The Black-tipped Darner is currently ranked S2S4 as a "potential species of concern" in Montana because it is potentially at risk of extirpation in the state, due to limited and/or declining numbers, range and/or habitat, even though it may be abundant in some areas.									
Arigomphus cornutus Horned Clubtail	Gomphidae Clubtail Dragonflies	G4	S2S4					6%	Prairie Streams / Rivers
Species Occurrences verified in these Counties: State Rank Reason: The Horned Clubtail dragonfly is currently listed as an "S2S4" species of potential concern in Montana because they are potentially at risk because of limited and/or declining numbers, range and/or habitat, even though it may be abundant in some areas. This rank is based on limited collections, but is probably more widespread than the rank implies.									
Epitheca spinigera Spiny Baskettail	Corduliidae Emerald Dragonflies	G5	S3S5					18%	Wetlands / lakes with emergent veg
Species Occurrences verified in these Counties: State Rank Reason: The Spiny Baskettail is currently ranked S3S5 as a "potential species of concern" in Montana because it is potentially at risk of extirpation in the state, due to limited and/or declining numbers, range and/or habitat, even though it may be abundant in some areas.									

Gomphus externus Plains Clubtail	Gomphidae Clubtail Dragonflies	G5	S2S4					30%	Large prairie rivers
Species Occurrences verified in these Counties: State Rank Reason: The plains clubtail is currently ranked S2S4 as a "potential species of concern" in Montana because it is potentially at risk of extirpation in the state due to limited and/or declining numbers, range and/or habitat, even though it may be abundant in some areas.									
Gomphus graslinellus Pronghorn Clubtail	Gomphidae Clubtail Dragonflies	G5	S3S5					65%	Large prairie rivers
Species Occurrences verified in these Counties: State Rank Reason: The pronghorn clubtail is currently ranked S3S5 as a "potential species of concern" in Montana because it is potentially at risk of extirpation in the state due to limited and/or declining numbers, range and/or habitat, even though it may be abundant in some areas.									
Ladona julia Chalk-fronted Corporal	Libellulidae Skimmer Dragonflies	G5	S3S4					16%	Wetlands / lakes with emergent veg
Species Occurrences verified in these Counties: State Rank Reason: The Chalk-fronted Corporal dragonfly is currently listed as an "S3S4" species of concern in Montana because they are potentially at risk because of limited and/or declining numbers, range and/or habitat, even though it may be abundant in some areas.									
Leucorrhinia glacialis Crimson-ringed Whiteface	Libellulidae Skimmer Dragonflies	G5	S3					32%	Wetlands / lakes with emergent veg
Species Occurrences verified in these Counties: State Rank Reason: The Crimson-ringed Whiteface is currently ranked S3 as a "potential species of concern" in Montana because it is potentially at risk of extirpation in the state, due to limited and/or declining numbers, range and/or habitat, even though it may be abundant in some areas.									
Libellula saturata Flame Skimmer	Libellulidae Skimmer Dragonflies	G5	S2S4					47%	Wetlands / lakes with emergent veg
Species Occurrences verified in these Counties: State Rank Reason: The Flame Skimmer dragonfly is currently listed as an "S2S4" species of concern in Montana because they are potentially at risk because of limited and/or declining numbers, range and/or habitat, even though it may be abundant in some areas.									
Ophiogomphus occidentis Sinuous Snaketail	Gomphidae Clubtail Dragonflies	G5	S2S4					17%	Large cold rivers
Species Occurrences verified in these Counties: State Rank Reason: The sinuous snaketail is currently ranked S2S4 as a "potential species of concern" in Montana because it is potentially at risk of extirpation in the state due to limited and/or declining numbers, range and/or habitat, even though it may be abundant in some areas. Recent collections are expanding our knowledge and its known distribution in the state (Kohler, pers. comm)									
Rhionaeschna californica California Darner	Aeshnidae Darner Dragonflies	G5	S3S5					69%	Wetlands / lakes with emergent veg
Species Occurrences verified in these Counties: State Rank Reason: The California Darner is currently ranked S3S5 as a "potential species of concern" in Montana because it is potentially at risk of extirpation in the state due to limited and/or declining numbers, range and/or habitat, even though it may be abundant in some areas.									
Rhionaeschna multicolor Blue-eyed Darner	Aeshnidae Darner Dragonflies	G5	S2S4					84%	Wetlands / lakes with emergent veg
Species Occurrences verified in these Counties: State Rank Reason: The Blue-eyed Darner is currently ranked S2S4 as a "potential species of concern" in Montana because it is potentially at risk of extirpation in the state, due to limited and/or declining numbers, range and/or habitat, even though it may be abundant in some areas.									
Somatochlora albicincta Ringed Emerald	Corduliidae Emerald Dragonflies	G5	S1S3					19%	Wetlands
Species Occurrences verified in these Counties: State Rank Reason: The Ringed Emerald is currently ranked S1S3 as a "potential species of concern" in Montana because it is potentially at risk of extirpation in the state, due to limited and/or declining numbers, range and/or habitat, even though it may be abundant in some areas.									
Somatochlora hudsonica Hudsonian Emerald	Corduliidae Emerald Dragonflies	G5	S2S4					32%	Wetlands / lakes with emergent veg
Species Occurrences verified in these Counties: State Rank Reason: The Hudsonian emerald dragonfly is currently listed as an "S2S4" species of concern in Montana because they are potentially at risk because of limited and/or declining numbers, range and/or habitat, even though it may be abundant in some areas.									
Somatochlora minor Ocellated Emerald	Corduliidae Emerald Dragonflies	G5	S2S4					56%	Wetlands / lakes with emergent veg
Species Occurrences verified in these Counties: State Rank Reason: The Ocellated emerald dragonfly is currently listed as an "S2S4" potential species of concern in Montana because they are potentially at risk because of limited and/or declining numbers, range and/or habitat, even though it may be abundant in some areas.									
Somatochlora semicircularis Mountain Emerald	Corduliidae Emerald Dragonflies	G5	S3S5					32%	Wetlands
Species Occurrences verified in these Counties: State Rank Reason: The Mountain Emerald is currently ranked S3S5 as a "potential species of concern" in Montana because it is potentially at risk of extirpation in the state, due to limited and/or declining numbers, range and/or habitat, even though it may be abundant in some areas.									
Sympetrum madidum Red-veined Meadowhawk	Libellulidae Skimmer Dragonflies	G5	S2S3					100%	Wetlands / lakes with emergent veg

		<p>Species Occurrences verified in these Counties: State Rank Reason: The Red-veined Meadowhawk dragonfly is currently listed as an "S2S3" species of concern in Montana because they are potentially at risk because of limited and/or declining numbers, range and/or habitat, even though it may be abundant in some areas. The extension of their range into eastern Montana will likely remove this species from the list with a new status review.</p>							
--	--	---	--	--	--	--	--	--	--

MAYFLIES

Anaetris eximia A Sand-dwelling Mayfly	Acanthametropodidae Acanthametropodid Mayflies	G3	S3							Large prairie rivers
<p>Species Occurrences verified in these Counties: State Rank Reason: This sand-dwelling mayfly is currently ranked S3 as a "potential species of concern" in Montana because is potentially at risk of extirpation in the state due to limited and/or declining numbers, range and/or habitat, even though it may be abundant in some areas. The specialized habitat this species requires in prairie rivers has been lost with the damming and diverting of our large prairie rivers such as the Bighorn, Tongue, Milk and Marias.</p>										
Baetisca columbiana A Mayfly	Baetiscidae	G2G4	SU							Large, cold rivers
<p>Species Occurrences verified in these Counties:</p>										
Caudatella edmundsi Northern Rocky Mountains Refugium Mayfly	Ephemerellidae Ephemerellid Mayflies	G4	S3					25%	10%	Small forested mountain streams
<p>Species Occurrences verified in these Counties: State Rank Reason: This NRMV mayfly is currently ranked S3 as a "potential species of concern" in Montana because it is potentially at risk of extirpation in the state due to limited and/or declining numbers, range and/or habitat, even though it may be abundant in some areas. This species was taken off the SOC list in 2011 after targeted habitat sampling found many more occurrences and we have determined that they are fairly wide-ranging in the western portion of the state, but still worthy of being watched for future declines.</p>										

STONEFLIES

Bolshecapnia missiona Mission Mountains Snowfly	Capniidae Small Winter Stoneflies	G2	SU							Mountain Streams
<p>Species Occurrences verified in these Counties: State Rank Reason: The Mission Mtn Stonefly is currently listed as an "SNR" species of potential concern in Montana because they are potentially at risk because of limited and/or declining numbers, range and/or habitat, even though it may be abundant in some areas. This rank is based on limited collections, but is probably more widespread than the rank implies. This species is currently known from only about a half dozen creeks in Flathead, Lake and Missoula Counties, all in Montana (Baurmann and Potter 2007, Newell et al. 2008).</p>										

INVERTEBRATES - MOLLUSKS **4 SPECIES**

SCIENTIFIC NAME COMMON NAME TAXA SORT	FAMILY (SCIENTIFIC) FAMILY (COMMON)	GLOBAL RANK	STATE RANK	USFWS	USFS	BLM	FWP SWAP	% OF GLOBAL BREEDING RANGE IN MT	% OF MT THAT IS BREEDING RANGE	HABITAT
Fisherola nuttalli Shortface Lanx	Lymnaeidae Fossarials / Pondsnails / Lanxs	G2	SH					0%	0%	Large Mountain Rivers
<p>Species Occurrences verified in these Counties:</p>										
Fluminicola fuscus Columbia Pebblesnail	Hydrobiidae Amnicolas / Dusksnails	G2	SH							Medium- and large-sized rivers
<p>Species Occurrences verified in these Counties:</p>										
Radiodiscus abietum Fir Pinwheel	Charopidae Pinwheels	G4	S3S4						8%	Moist conifer forests
<p>Species Occurrences verified in these Counties:</p>										
Valvata tricarinata Threeridge Valvata	Valvatidae Valvatas	G5	S2S3						1%	Large Rivers / Lakes
<p>Species Occurrences verified in these Counties: State Rank Reason: The Three-ridge valvata is currently ranked a "S2S3" Potential Species of Concern in MT and is potentially at risk because of limited and/or potentially declining population numbers, range and/or habitat, making it vulnerable. Known occurrences in Montana are widely disjunct.</p>										

INVERTEBRATES - OTHER **1 SPECIES**

SCIENTIFIC NAME COMMON NAME TAXA SORT	FAMILY (SCIENTIFIC) FAMILY (COMMON)	GLOBAL RANK	STATE RANK	USFWS	USFS	BLM	FWP SWAP	% OF GLOBAL BREEDING RANGE IN MT	% OF MT THAT IS BREEDING RANGE	HABITAT
FRESHWATER SPONGES										
Heteromeyenia baileyi A Freshwater Sponge	Spongillidae Spongillid Sponges	G5	S1S3							Lakes
<p>Species Occurrences verified in these Counties: State Rank Reason: This Freshwater Sponge is currently ranked a "S1S3" Potential Species of Concern in MT and is potentially at risk because of limited and/or potentially declining population numbers, range and/or habitat, making it vulnerable. Known occurrences in Montana are limited to one lake in Lincoln County.</p>										

Special Status Species

ADDITIONS TO STATEWIDE LIST		
SPECIES	DATE	NOTES
Lasiurus borealis Eastern Red Bat	9/25/2018	Recent surveys using acoustic detectors have shown this species to be present across much of central and eastern Montana during the summer and fall. Tree roosting bat species, including the Eastern Red Bat, are commonly killed at wind farms, which presents a substantial threat to the long-term viability of populations within the state.
Myotis yumanensis Yuma Myotis	9/25/2018	In Montana populations of this species are believed to be stable. However, the threat of catastrophic decline from White-Nose Syndrome, a fungal disease of bats responsible for the deaths of millions of individuals of closely related species in other areas, presents a threat of substantial declines within the state. Recent observations from Washington have confirmed the susceptibility of this species to WNS infection.
Myotis septentrionalis Northern Myotis	9/24/2018	Recent survey efforts have established year-round presence of the species in Montana, and have provided enough data to assign a status rank.
Pyrgulopsis blainica Blaine Pyrg	5/3/2016	Species is endemic to Montana and is only found in the outflow from one spring in Madison County.
Cryptomastix sanburni Kingston Oregonian	5/3/2016	Species is endemic to far western Montana and Idaho. There are no recent collections.
Pristiloma idahoense Thinlip Tightcoil	4/26/2016	Recently discovered in Montana. Lack of detection in recent broadscale terrestrial mollusk surveys indicates its rarity in Montana and the species is globally rare.
Myotis lucifugus Little Brown Myotis	4/21/2014	State risk upgraded from S4 to S3 because global risk was upgraded to G3 by NatureServe; state risk cannot be more secure than global risk.
Cicindela arenicola Saint Anthony Dune Tiger Beetle	10/7/2013	Species risk evaluated at S1S2 as a result of its global rarity and recently detected occupancy of isolated suitable habitat in the Centennial Sandhills of southwest Montana.
Sorex hoyi Pygmy Shrew	5/10/2013	Risk evaluated at S3 due to apparent rarity and intrinsic vulnerability.
Coccothraustes vespertinus Evening Grosbeak	4/17/2012	Risk evaluated at S3 because populations in Montana and across the Northern Rockies have undergone significant recent declines.
Pipilo chlorurus Green-tailed Towhee	4/17/2012	Risk evaluated at S3 because populations in Montana and across the Northern Rockies have undergone recent declines.
Surnia ulula Northern Hawk Owl	4/17/2012	Risk evaluated at S3 because species has a small population and limited distribution in Montana.
Ixoreus naevius Varied Thrush	4/17/2012	Risk evaluated at S3 because species has undergone recent population declines in Montana and across the Northern Rockies and faces threats from fire, insect outbreak, and timber harvest related to climate change.
Canis lupus Gray Wolf	8/5/2010	On 8/5/2010 a judge in U.S. district court reversed the U.S. Fish and Wildlife Service's decision to delist, thereby placing them back on the Endangered Species List. The species was added back onto the Montana Species of Concern List despite its S4 ranking in order to make this federal status information available on environmental reviews.
Myoxocephalus thompsonii Deepwater Sculpin	4/8/2010	Risk evaluated at S3 due to extremely restricted distribution. This species occupies <=5% of Montana.
Etheostoma exile Iowa Darter	4/8/2010	Risk evaluated at S3 due primarily to restricted distribution. Montana populations also face threats from introductions of Northern Pike and intensive agriculture and grazing.
Chrosomus eos Northern Redbelly Dace	4/8/2010	Risk evaluated at S3 due to declining population trends that appear to be linked to the introduction of Northern Pike. Intensive agriculture and grazing also represent threats to the species.
Prosopium coulteri Pygmy Whitefish	4/8/2010	Risk evaluated at S3 due to restricted and disjunct distribution. This species occupies <=5% of Montana.
Tympanuchus phasianellus Sharp-tailed Grouse	2/26/2010	A recent genetic study indicates that populations formerly found west of the Continental Divide were more appropriately recognized as the same subspecies of Sharp-tailed Grouse found across eastern Montana rather than Columbian Sharp-tailed Grouse. Therefore, populations of Sharp-tailed Grouse (Tympanuchus phasianellus) west of the Continental Divide are a Species of Concern with a state rank of S1 and populations east of the Continental Divide have a state rank of S4 and are not a Species of Concern.
Grylloblatta campodeiformis Northern Rock Crawler	2/1/2010	Species recently identified as occurring in the state. State risk assessed at S3S4 because the species is listed by Jarvis and Whiting (2006) as having near Threatened status by IUCN standards, but yet assessed by IUCN.
Oreohelix haydeni Lyrate Mountainsnail	1/7/2010	Species recently identified as occurring in the state during the course of a literature review. State risk assessed at S13 because Montana only represents a portion of the species' range and its global risk is rated at G23 by NatureServe.
Oreohelix pygmaea Pygmy Mountainsnail	1/7/2010	Species recently identified as occurring in the state during the course of a literature review. State risk assessed at S1 because its global risk is rated at G1 by NatureServe.
Coccyzus erythrophthalmus Black-billed Cuckoo	5/1/2009	Risk upgraded from S3S4 to S3 due to declining population trends in Montana and surrounding states and provinces.

ADDITIONS TO STATEWIDE LIST		
SPECIES	DATE	NOTES
Himantopus mexicanus Black-necked Stilt	5/1/2009	Risk upgraded from S3S4 to S3 due to threats to wetland habitats species is dependent on.
Certhia americana Brown Creeper	5/1/2009	Risk upgraded from S4 to S3 due to threats to mature conifer forest habitats from insect outbreaks and fire.
Aquila chrysaetos Golden Eagle	5/1/2009	Risk upgraded from S4 to S3 due to recent evidence for range-wide declines and threats posed from energy development.
Ardea herodias Great Blue Heron	5/1/2009	Risk upgraded from S3S4 to S3 due to declining population trends and threats to nesting habitat.
Podiceps auritus Horned Grebe	5/1/2009	Risk upgraded from S4 to S3 due to declining population trends and threats to wetland breeding habitats.
Accipiter gentilis Northern Goshawk	5/1/2009	Risk upgraded from S4 to S3 due to increased threats to habitat from insect outbreaks and fire.
Troglodytes pacificus Pacific Wren	5/1/2009	Risk upgraded from S4 to S3 due to increased threats to habitat from insect outbreaks and fire.
Dryocopus pileatus Pileated Woodpecker	5/1/2009	Risk upgraded from S4 to S3 due to increased threats to habitat from insect outbreaks and fire.
Catharus fuscescens Veery	5/1/2009	Risk upgraded from S4 to S3 due to declining population trends and threats to riparian breeding habitat.
Soyedina potteri Northern Rocky Mountains Refugium Stonefly	5/1/2009	State risk upgraded to S2 because global risk was upgraded to G2 by NatureServe, state risk cannot be more secure than global risk.
Lasiurus cinereus Hairy Bat	10/1/2008	Risk upgraded from S3S4 to S3 due to threat posed by collision with wind turbines and threats to broadleaf riparian forests..
Botaurus lentiginosus American Bittern	10/1/2008	Risk upgraded from S4 to S3 due to threats to wetland breeding habitats.
Haemorhous cassinii Cassin's Finch	10/1/2008	Risk upgraded from S5 to S3 due to declining population trends threats to conifer forest habitats from insect outbreaks and fire.
Aechmophorus clarkii Clark's Grebe	10/1/2008	Risk upgraded from S2S4 to S3 due to threats to wetland breeding habitats.
Nucifraga columbiana Clark's Nutcracker	10/1/2008	Risk upgraded from S5 to S3 due to declining population trends and threats to conifer forest habitats from disease, insect outbreaks, and fire.
Gymnorhinus cyanocephalus Pinyon Jay	10/1/2008	Risk upgraded from S4 to S3 due to declining population trends.
Rhyacophila rickeri A Rhyacophilan Caddisfly	10/1/2008	Risk assessed at S2 as a result of recent baseline surveys and literature records indicating that the species is rare within its known range in Montana and because drought and climate change represent threats to the species' limited habitat.
Rhyacophila potteri A Rhyacophilan Caddisfly	10/1/2008	Risk assessed at S2 as a result of recent baseline surveys and literature records indicating that the species is rare within its known range in Montana and because drought and climate change represent threats to the species' limited habitat.
Rhyacophila gemona A Rhyacophilan Caddisfly	10/1/2008	Risk assessed at S2 as a result of baseline surveys and literature records indicating that the species is rare within its known range in Montana and because drought and climate change represent threats to the species' limited habitat.
Goereilla baumanni Northern Rocky Mountains Refugium Caddisfly	10/1/2008	Risk assessed at S2 as a result of recent baseline surveys and literature records indicating that the species is rare within its known range in Montana and because drought and climate change represent threats to the species' limited habitat.
Rossiana montana Northern Rocky Mountains Refugium Caddisfly	10/1/2008	Risk assessed at S2 as a result of recent baseline surveys and literature records indicating that the species is rare within its known range in Montana and because drought and climate change represent threats to the species' limited habitat.
Caurinella idahoensis Lolo Mayfly	10/1/2008	Risk upgraded from S3 to S2 as a result of baseline surveys and literature records indicating that the species is rare within its known range in Montana and because drought and climate change represent threats to the species' limited habitat.
Soliperla salish Clearwater Roachfly	10/1/2008	Risk assessed at S2 as a result of recent baseline surveys and literature records indicating that the species is rare within its known range in Montana and because drought and climate change represent threats to the species' limited habitat.
Prophysaon andersoni Reticulate Taildropper	10/1/2008	Risk upgraded from S13 to S12 because recent surveys indicate the species is quite rare within their known range in Montana.

ADDITIONS TO STATEWIDE LIST		
SPECIES	DATE	NOTES
Margaritifera falcata Western Pearlshell	10/1/2008	Risk upgraded from S24 to S2 because recent surveys indicate the species has undergone dramatic declines across their former range in Montana.
Blarina brevicauda Northern Short-tailed Shrew	7/1/2006	Risk assessed at S1S3 as a result of their recent detection in Montana with a likely limited distribution.
Spilogale gracilis Western Spotted Skunk	7/1/2006	Risk assessed with a range rank of S1S3 as a result of only a single detection of the species in Montana since 1995.
Dicamptodon aterrimus Idaho Giant Salamander	7/1/2006	Risk assessed at S1S3 as a result of their recent detection in Montana with a likely limited distribution.
Salvelinus namaycush Lake Trout	7/1/2006	Risk assessed at S2 due to declining trends in, and restricted distribution of, native populations.
Stylurus intricatus Brimstone Clubtail	7/1/2006	Risk assessed at S1 because of rarity of habitat and threats to large prairie river breeding habitat.
Raptoheptagenia cruentata A Mayfly	7/1/2006	Risk assessed at S2 because of rarity of habitat and threats to large prairie river breeding habitat.
Lachlania saskatchewanensis A Sand-dwelling Mayfly	7/1/2006	Risk assessed at S1 because of rarity of habitat and threats to large prairie river breeding habitat.
Macdunnhoa nipawinia A Sand-dwelling Mayfly	7/1/2006	Risk assessed at S2 because of rarity of habitat and threats to large prairie river breeding habitat.
Homoeoneuria alleni A Sand-dwelling Mayfly	7/1/2006	Risk assessed at S2 because of rarity of habitat and threats to large prairie river breeding habitat.
Anepeorus rusticus A Sand-dwelling Mayfly	7/1/2006	Risk assessed at S1 because of rarity of habitat and threats to large prairie river breeding habitat.
Pyrgulopsis bedfordensis Bedford Springsnail	7/1/2006	Risk assessed at S1 because species' known global distribution is restricted to a single warm spring on the west side of Canyon Ferry Reservoir.
Kootenaia burkei Pygmy Slug	7/1/2006	Risk assessed at S12 due to rarity and limited known distribution.
Haplotrema vancouverense Robust Lance-tooth	7/1/2006	Risk assessed at S12 as a result of recent surveys and literature records indicating the species is rare with its known breeding range in Montana and because drought and climate change represent threats to the species' limited habitat.
Prophysaon humile Smoky Taildropper	7/1/2006	Risk assessed at S13 as a result of recent surveys and literature records indicating the species is rare with its known breeding range in Montana and because drought and climate change represent threats to the species' limited habitat.
Pacifastacus gambelii Pilose Crayfish	7/1/2006	Risk assessed at S1 because recent surveys have failed to detect them throughout their former known range in Montana.
Ephydatia cooperensis A Freshwater Sponge	7/1/2006	Risk assessed at S13 because of rarity and limited known distribution.
Adrietyla cucullata A Millipede	7/1/2006	Risk assessed at S13 because of rarity and limited known distribution.
Austrotyla montani A Millipede	7/1/2006	Risk assessed at S13 because of rarity and limited known distribution.
Corypus cochlearis A Millipede	7/1/2006	Risk assessed at S13 because of rarity and limited known distribution.
Endopus parvipes A Millipede	7/1/2006	Risk assessed at S13 because of rarity and limited known distribution.
Lophomus laxus A Millipede	7/1/2006	Risk assessed at S13 because of rarity and limited known distribution.
Orophe cabinetus A Millipede	7/1/2006	Risk assessed at S13 because of rarity and limited known distribution.
Orthogmus oculatus A Millipede	7/1/2006	Risk assessed at S13 because of rarity and limited known distribution.
Taiyutyla curvata A Millipede	7/1/2006	Risk assessed at S13 because of rarity and limited known distribution.

Anthus spragueii Sprague's Pipit	8/1/2001	Risk assessed at S3S4 due to threats to habitat.
Plegadis chihi White-faced Ibis	8/1/2001	Risk assessed at S1 due to limited distribution and apparent rarity in Montana.
Lagopus leucura White-tailed Ptarmigan	8/1/2001	Risk assessed at S3 due to apparent rarity and threats to habitat.
Sceloporus graciosus Common Sagebrush Lizard	8/1/2001	Risk assessed at S3 due to apparent rarity as indicated by available data.
Plestiodon skiltonianus Western Skink	8/1/2001	Risk assessed at S3 due to apparent rarity.
Anaxyrus cognatus Great Plains Toad	8/1/2001	Risk assessed at S3 due to apparent rarity.
Sander canadensis Sauger	8/1/2001	Risk assessed at S2 due to declining population trends.
Zaitzevia therae Warm Spring Zaitzevian Riffle Beetle	8/1/2001	Risk assessed at S1 due to limited distribution and apparent rarity in Montana.
Oncopodura cruciata A Springtail	8/1/2001	Risk assessed at S12 due to limited distribution and apparent rarity in Montana.
Discus shimekii Striate Disc	8/1/2001	Risk assessed at S1 due to apparent rarity.
Sclerobunus cavicolens A Cave Obligate Harvestman	8/1/2001	Risk assessed at S12 due to limited distribution and apparent rarity in Montana.
Salmasellus steganothrix A Cave Obligate Isopod	8/1/2001	Risk assessed at S12 due to apparent rarity.
Stygobromus montanensis A Subterranean Amphipod	8/1/2001	Risk assessed at S12 due to limited distribution and apparent rarity in Montana.
Stygobromus obscurus A Subterranean Amphipod	8/1/2001	Risk assessed at S12 due to limited distribution and apparent rarity in Montana.
Stygobromus puteanus A Subterranean Amphipod	8/1/2001	Risk assessed at S12 due to limited distribution and apparent rarity in Montana.
Lasiurus borealis Eastern Red Bat	1/1/1999	Risk assessed at S1 due to apparent rarity in Montana.
Anaxyrus boreas Western Toad	1/1/1999	Risk assessed at S3S4 due to declining population trends.
Poliophtila caerulea Blue-gray Gnatcatcher	3/1/1997	Risk assessed at S1 due to limited distribution and apparent rarity in Montana.

Oreohelix sp. 31 Byrne Resort Mountainsnail	3/1/1997	Risk assessed at S12 due to apparent rarity.
Oreohelix sp. 4 Drummond Mountainsnail	3/1/1997	Risk assessed at S1 due to apparent rarity.
Oreohelix yavapai mariae Gallatin Mountainsnail	3/1/1997	Risk assessed at S1 due to apparent rarity.
Oreohelix sp. 6 Kintla Lake Mountainsnail	3/1/1997	Risk assessed at S1 due to apparent rarity.
Oreohelix sp. 7 Kitchen Creek Mountainsnail	3/1/1997	Risk assessed at S12 due to apparent rarity.
Ammicola sp. 2 Lake Amnicola	3/1/1997	Risk assessed at S1 due to apparent rarity.
Discus brunsoni Lake Disc	3/1/1997	Risk assessed at SH (historic records only) due to collection at a single locality without resurvey in several decades.
Physa megalochlamys Large-mantle Physa	3/1/1997	Risk assessed at S1 due to apparent rarity.
Oreohelix sp. 10 Missoula Mountainsnail	3/1/1997	Risk assessed at S13 due to apparent rarity.
Stagnicola montanensis Mountain Marshsnail	3/1/1997	Risk assessed at S13 due to apparent rarity.
Zacoleus idahoensis Sheathed Slug	3/1/1997	Risk assessed at S12 due to apparent rarity.
Fisherola nuttalli Shortface Lark	3/1/1997	Risk assessed at S13 due to apparent rarity.
Oreohelix sp. 11 Subcarinate Mountainsnail	3/1/1997	Risk assessed at S1 due to apparent rarity.
Cynomys ludovicianus Black-tailed Prairie Dog	6/1/1996	Risk assessed at S3S4 due to declining population trends, unknown viability of many current colonies, and its key role in the life history of several other threatened and endangered species.
Ammodramus nelsoni Nelson's Sparrow	6/1/1996	Risk assessed at S1 due to limited distribution and apparent rarity in Montana after recent first detections of breeding individuals.

ADDITIONS TO STATEWIDE LIST

SPECIES	DATE	NOTES
Coturnicops noveboracensis Yellow Rail	6/1/1996	Risk assessed at S1 due to limited distribution and apparent rarity in Montana after recent first detections of breeding individuals.
Lithobates pipiens Northern Leopard Frog	6/1/1996	Risk assessed at S3S4 due to catastrophic population declines in western Montana and apparent declines in eastern Montana.
Oreohelix alpina Alpine Mountainsnail	6/1/1996	Risk assessed at S1 due to limited distribution and apparent rarity in Montana.
Oreohelix amariradix Bitterroot Mountainsnail	6/1/1996	Risk assessed at S12 due to limited distribution and apparent rarity in Montana.
Magnipelta mycophaga Magnum Mantleslug	6/1/1996	Risk assessed at S13 due to limited distribution and apparent rarity in Montana.
Hemphillia danielsi Marbled Jumping-slug	6/1/1996	Risk assessed at S13 due to limited distribution and apparent rarity in Montana.
Myotis evotis Long-eared Myotis	2/1/1995	Added to list because species was on the USFWS Category 2 Candidate list.
Myotis volans Long-legged Myotis	2/1/1995	Added to list because species was on the USFWS Category 2 Candidate list.
Myotis ciliolabrum Western Small-footed Myotis	2/1/1995	Added to list because species was on the USFWS Category 2 Candidate list.
Myotis yumanensis Yuma Myotis	2/1/1995	Added to list because species was on the USFWS Category 2 Candidate list.
Empidonax alorum Alder Flycatcher	2/1/1995	Risk assessed at S1 because of limited distribution and rarity of breeding populations in Montana.
Sceloporus graciosus Common Sagebrush Lizard	2/1/1995	Added to list because species was on the USFWS Category 2 Candidate list and because of apparent rarity.
Phrynosoma hernandesi Greater Short-horned Lizard	2/1/1995	Added to list because species was on the USFWS Category 2 Candidate list. Note: at this time the species in Montana was recognized as Short-horned Lizard (<i>Phrynosoma douglasi</i>).
Rana luteiventris Columbia Spotted Frog	2/1/1995	Added to list because species was on the USFWS Category 2 Candidate list.
Ascaphus montanus Rocky Mountain Tailed Frog	2/1/1995	Added to list because species was on the USFWS Category 2 Candidate list.
Platygobio gracilis Flathead Chub	2/1/1995	Added to list because species was on the USFWS Category 2 Candidate list.
Hybognathus placitus Plains Minnow	2/1/1995	Added to list because species was on the USFWS Category 2 Candidate list.
Hybognathus argyritis Western Silvery Minnow	2/1/1995	Added to list because species was on the USFWS Category 2 Candidate list.
Speyeria idalia Regal Fritillary	2/1/1995	Added to list because species was on the USFWS Category 2 Candidate list.
Phyciodes batesii Tawny Crescent	2/1/1995	Added to list because species was on the USFWS Category 2 Candidate list and because of apparent rarity.
Oreohelix strigosa berryi Berry's Mountainsnail	2/1/1995	Added to list because species was on the USFWS Category 2 Candidate list and because of apparent rarity.
Discus shimekii Striate Disc	2/1/1995	Added to list because species was on the USFWS Category 2 Candidate list. Note: this addition referred to Cockerell's Striate Disc (<i>Discus shimeki cockerelli</i>); this subspecies is no longer recognized from Montana.
Leucophaeus pipixcan Franklin's Gull	3/1/1994	Risk assessed at S3S4 due to rarity of breeding records and habitat.
Sorex merriami Merriam's Shrew	5/1/1993	Risk assessed at S3 for undocumented reasons.
Cypseloides niger Black Swift	5/1/1993	Risk assessed at S3 for undocumented reasons.

ADDITIONS TO STATEWIDE LIST		
SPECIES	DATE	NOTES
Mniotilta varia Black-and-white Warbler	5/1/1993	Risk assessed at S1S3 for undocumented reasons.
Nycticorax nycticorax Black-crowned Night-Heron	5/1/1993	Risk assessed at S3 for undocumented reasons.
Himantopus mexicanus Black-necked Stilt	5/1/1993	Risk assessed at S3 for undocumented reasons.
Poecile hudsonicus Boreal Chickadee	5/1/1993	Risk assessed at S3 for undocumented reasons.
Hydroprogne caspia Caspian Tern	5/1/1993	Risk assessed at S3 for undocumented reasons.
Tyrannus vociferans Cassin's Kingbird	5/1/1993	Risk assessed at S1S3 for undocumented reasons.
Aechmophorus clarkii Clark's Grebe	5/1/1993	Risk assessed at S2S4 for undocumented reasons.
Sterna hirundo Common Tern	5/1/1993	Risk assessed at S3 for undocumented reasons.
Sterna forsteri Forster's Tern	5/1/1993	Risk assessed at S3 for undocumented reasons.
Passerina cyanea Indigo Bunting	5/1/1993	Risk assessed at S2S4 for undocumented reasons.
Brachylagus idahoensis Pygmy Rabbit	9/1/1992	Risk assessed at S4 for undocumented reasons.
Centronyx bairdii Baird's Sparrow	9/1/1992	Risk assessed at S3 for undocumented reasons.
Chlidonias niger Black Tern	9/1/1992	Risk assessed at S3 for undocumented reasons.
Picoides arcticus Black-backed Woodpecker	9/1/1992	Risk assessed at S3 for undocumented reasons.
Lanius ludovicianus Loggerhead Shrike	9/1/1992	Risk assessed at S5 for undocumented reasons.
Accipiter gentilis Northern Goshawk	9/1/1992	Risk assessed at S4 for undocumented reasons.
Rana luteiventris Columbia Spotted Frog	9/1/1992	Risk assessed at S4 and added to list for undocumented reasons.
Dicamptodon aterrimus Idaho Giant Salamander	9/1/1992	Added to list as a result of recognition of the Idaho Giant Salamander as a sister species to the Pacific Giant Salamander (<i>Dicamptodon aterrimus</i>) which was formerly recognized as having discontinuous coastal and inland populations. Risk was assessed at S1 due to rarity and limited likely distribution.
Cycleptus elongatus Blue Sucker	9/1/1992	Risk assessed at S3 for undocumented reasons.
Acroloxus coloradensis Rocky Mountain Capshell	9/1/1992	Risk assessed at S1 for undocumented reasons.
Myotis septentrionalis Northern Myotis	2/15/1989	Added because species was formerly recognized as synonymous with Keen's Myotis (<i>Myotis keenii</i>). Thus, Keen's Myotis was dropped and Northern Myotis was added.
Sternula antillarum Least Tern	2/15/1989	Risk assessed at S1 for undocumented reasons.
Plegadis chihi White-faced Ibis	2/15/1989	Risk assessed at S1 for undocumented reasons.
Elgaria coerulea Northern Alligator Lizard	4/22/1987	Risk assessed at S3 for undocumented reasons.
Notropis hudsonius Spottail Shiner	4/22/1987	Risk assessed at S3 for undocumented reasons.

SPECIES REMOVED FROM STATEWIDE LIST		
SPECIES	DATE	NOTES
Spea bombyfrons Plains Spadefoot	9/25/2018	Recent nocturnal calling surveys conducted after precipitation events on warm evenings have often detected this species east of the Continental Divide. It appears that the previous perception of rarity was due in part to lack of historical survey effort and difficulty detecting the species during much of the year and in most weather conditions. Given these data, the SOC status can no longer be justified and the rank has been increased to S4.
Caenis youngi A Mayfly	6/23/2015	Removed from SOC list after macroinvertebrate surveys across Montana found the species to be less habitat-restricted than previously believed.
Sceloporus graciosus Common Sagebrush Lizard	5/10/2013	Risk downgraded from S3 to S4 due to detection of apparently stable populations in a high percentage of rock outcrop sites across their known range in eastern Montana (higher percentages in southeastern Montana and lower percentages in northeastern Montana).
Lepus californicus Black-tailed Jack Rabbit	5/8/2013	Moved to PSOC list with a new state rank of SU and noted as a "Species of Highest Inventory Need" due to a lack of information on distribution and status.
Lasiurus borealis Eastern Red Bat	5/8/2013	Moved to PSOC list with a new state rank of SU and noted as a "Species of Highest Inventory Need" due to a lack of information on distribution and status.
Chaetodipus hispidus Hispid Pocket Mouse	5/8/2013	Moved to PSOC list with a new state rank of SU and noted as a "Species of Highest Inventory Need" due to a lack of information on distribution and status.
Zapus hudsonius Meadow Jumping Mouse	5/8/2013	Moved to PSOC list with a new state rank of SU and noted as a "Species of Highest Inventory Need" due to a lack of information on distribution and status.
Tamias umbrinus Uinta Chipmunk	5/8/2013	Moved to PSOC list with a new state rank of SU and noted as a "Species of Highest Inventory Need" due to a lack of information on distribution and status.
Spilogale gracilis Western Spotted Skunk	5/8/2013	Moved to PSOC list with a new state rank of SU and noted as a "Species of Highest Inventory Need" due to a lack of information on distribution and status.
Haliaeetus leucocephalus Bald Eagle	4/17/2012	Risk downgraded from S3 to S4 because population numbers have steadily increased since the 1980s and breeding pairs now occupy a high percentage of suitable habitat across the state. However the species is still protected under the Bald and Golden Eagle Protection Act of 1940.
Ammodramus savannarum Grasshopper Sparrow	4/17/2012	Risk downgraded from S3B to S4B because although populations face some habitat loss, the estimated statewide population is large and population trends are stable to increasing.
Myotis septentrionalis Northern Myotis	7/19/2011	Moved to Potential Species of Concern List due to limited documentation and uncertainty about the species use of habitats in Montana. After statewide mist net and acoustic survey efforts, the species has only been documented at two localities. It is possible that the species uses habitats in Montana outside of the summer season that has been the focus of recent sampling efforts. Additional sampling is needed in the fall to see if the species is migrating through, or overwintering in, the state more regularly.
Canis lupus Gray Wolf	5/5/2011	On May 5, 2011, the Gray Wolf was removed from the Endangered Species Act by the Secretary of the Interior at the direction of the President of the United States and Congress under a rider associated with the Department of Defense and Full-Year Appropriations Act of 2011. Because the species was ranked at a state conservation status of S4 and was only included on the Species of Concern List in order to make its federal status information available in environmental reviews, federal delisting resulted in removal from the Species of Concern List.
Canis lupus Gray Wolf	5/25/2010	Risk evaluated at S4. Although the population is still relatively small, the species has expanded into available habitat across western Montana and has had a 528% increase in the number of breeding pairs in the state between 1999 and 2009. Plans for management of human conflict with wolves provide a high probability of maintaining a stable population into the future.
Picoides dorsalis American Three-toed Woodpecker	5/1/2009	Risk downgraded from S3S4 to S4 due to increasing availability of preferred habitats.
Icterus galbula Baltimore Oriole	5/1/2009	Risk downgraded from S3S4 to S4 due to habitats evaluated as less threatened than previously recognized.
Tyto alba Barn Owl	5/1/2009	Risk downgraded from S1 to S4 due to expanding range and population in Montana.
Mniotilta varia Black-and-white Warbler	5/1/2009	Risk downgraded from S2S3 to S4 due to habitats being evaluated as less threatened than previously recognized, but kept as a Potential Species of Concern due to limited survey effort.
Selasphorus platycercus Broad-tailed Hummingbird	5/1/2009	Risk downgraded from S1 to S4 due to stable population trends, but kept as a Potential Species of Concern due to limited baseline data in Montana.
Tyrannus vociferans Cassin's Kingbird	5/1/2009	Risk downgraded from S2 to S4 due to stable population trends, but kept as a Potential Species of Concern due to limited baseline data for Montana.
Spiza americana Dickcissel	5/1/2009	Risk downgraded from S1S2 to S4 due to stable population trends and fewer threats to habitats than previously recognized. Kept as a Potential Species of Concern due to limited baseline data in Montana.
Sialia sialis Eastern Bluebird	5/1/2009	Risk downgraded from S2 to S4 due to use of widely available artificial nest boxes and stable population trends. Kept as a Potential Species of Concern due to limited baseline data for Montana.

SPECIES REMOVED FROM STATEWIDE LIST

SPECIES	DATE	NOTES
Calamospiza melanocorys Lark Bunting	5/1/2009	Risk downgraded from S3 to S4 due to stable to increasing population trends.
Surnia ulula Northern Hawk Owl	5/1/2009	Risk downgraded from S1 to S4 due to stable population trends, but kept as a Potential Species of Concern due to limited baseline data in Montana.
Contopus cooperi Olive-sided Flycatcher	5/1/2009	Risk downgraded from S3 to S4 due to increasing trends in population and available habitat.
Icterus spurius Orchard Oriole	5/1/2009	Risk downgraded from S2S4 to S4 due to increasing population trends and habitats evaluated as less threatened than previously recognized.
Sphyrapicus thyroideus Williamson's Sapsucker	5/1/2009	Risk downgraded from S3S4 to S4 due to stable to increasing population trends and habitats evaluated as less threatened than previously recognized.
Lithobates pipiens Northern Leopard Frog	5/1/2009	Risk to eastern Montana populations downgraded from S3 to S4 due to widespread occupancy of suitable habitat in eastern Montana during recent surveys. Western Montana populations, which have been nearly extirpated since the early 1980s, remain at an S1 level of risk. Eastern populations were kept as Potential Species of Concern due to ongoing concerns about diseases such as the pathogenic chytrid fungus <i>Batrachochytrium dendrobatidis</i> .
Accipiter gentilis Northern Goshawk	10/1/2008	Risk downgraded from S3 to S4 due to recent surveys indicating the species is more common than previously recognized.
Agapetus montanus An Agapetus Caddisfly	10/1/2008	Risk downgraded from S2 to S3 due to habitat being evaluated as less threatened than previously recognized, but kept as a Potential Species of Concern due to potentially growing threats to habitat.
Radiodiscus abietum Fir Pinwheel	7/1/2006	Risk downgraded to Potential Species of Concern as a result of recent surveys and in order to remain consistent with other invertebrate species listed as Species of Concern.
Stagnicola montanensis Mountain Marshsnail	7/1/2006	Dropped from consideration because taxonomic research indicated that the species' designation was invalid.
Sorex hoyi Pygmy Shrew	7/1/2004	Risk downgraded from S3 to S4 because the species was evaluated as more common than previously recognized.
Spilogale gracilis Western Spotted Skunk	7/1/2004	Moved to Potential Species of Concern List for undocumented reasons.
Dicamptodon aterrimus Idaho Giant Salamander	1/1/2003	Dropped because reports of the species presence in Montana were deemed false.
Lasiurus borealis Eastern Red Bat	8/1/2001	Moved to the Species on Review List for undocumented reasons.
Myotis septentrionalis Northern Myotis	8/1/2001	Moved to Species on Review List because species is rare and possibly out of range.
Himantopus mexicanus Black-necked Stilt	8/1/2001	Moved to the Species on Review List for undocumented reasons.
Aegolius funereus Boreal Owl	8/1/2001	Dropped because species was found to be more common than previously recognized.
Aechmophorus clarkii Clark's Grebe	8/1/2001	Moved to Species on Review list for undocumented reasons.
Oreohelix sp. 3 Bearmouth Mountainsnail	8/1/2001	Dropped because taxa had not been formally described as a species.
Oreohelix sp. 5 Brunson Mountainsnail	8/1/2001	Dropped because taxa had not been formally described as a species.
Oreohelix sp. 31 Byrne Resort Mountainsnail	8/1/2001	Dropped because taxa had not been formally described as a species.
Oreohelix sp. 4 Drummond Mountainsnail	8/1/2001	Dropped because taxa had not been formally described as a species.
Oreohelix sp. 6 Kintla Lake Mountainsnail	8/1/2001	Dropped because taxa had not been formally described as a species.
Oreohelix sp. 7 Kitchen Creek Mountainsnail	8/1/2001	Dropped because taxa had not been formally described as a species.

MAMMALS (MAMMALIA)									12 SPECIES
SCIENTIFIC NAME COMMON NAME TAXA SORT	FAMILY (SCIENTIFIC) FAMILY (COMMON)	MT STATUS	GLOBAL RANK	STATE RANK	USFS FOREST	BLM FIELD OFFICE	FWP REGION	HABITAT	COMMENTS
Chaetodipus hispidus Hispid Pocket Mouse	Heteromyidae Pocket Mice / Kangaroo Rats	PSOC	G5	SU	Custer	Miles City	7	Mixed grassland dry forest	Surveys needed in mixed grassland and open Ponderosa Pine forest in Carter County.
Erethizon dorsatum Porcupine	Erethizontidae Porcupines	PSOC	G5	S4	All forests	All field offices	All regions	Mixed forest	Need baseline surveys of mixed conifer / deciduous forest with shrub understory statewide.
Euderma maculatum Spotted Bat	Vespertilionidae Bats	SOC	G4	S3	Beaverhead/Deerlodge, Custer, Helena, Lewis and Clark	Billings, Butte, Dillon, Havre, Lewistown	3, 4, 5, 6, 7	Cliffs with rock crevices	Need acoustic surveys targeting big cliff habitats. Once areas of high activity are identified, targeted mistnetting in the early to mid summer should be used to document breeding.
Lepus californicus Black-tailed Jack Rabbit	Leporidae Rabbits	PSOC	G5	SU	Beaverhead/Deerlodge	Dillon	3	Sagebrush grassland	Need summer and winter headlight / spotlight surveys in sagebrush and grassland habitats across Beaverhead and Madison counties.
Marmota caligata Hoary Marmot	Sciuridae Squirrels	PSOC	G5	S3S4	Beaverhead/Deerlodge, Bitterroot, Lewis and Clark, Lolo, Flathead, Kootenai	Dillon	1, 2, 3, 4	Alpine / Subalpine slopes	Need surveys of grass and forb covered alpine/subalpine slopes with talus nearby.
Myotis yumanensis Yuma Myotis	Vespertilionidae Bats	PSOC	G5	S3	Flathead, Kootenai, Lolo		1	Riparian and mixed forest	Need targeted acoustic surveys paired with mist netting and genetic analysis in Northwestern Montana.
Perognathus parvus Columbia Plateau Pocket Mouse	Heteromyidae Pocket Mice / Kangaroo Rats	SOC	G5	S3	Beaverhead/Deerlodge	Dillon	3	Sagebrush / grassland	Need surveys target grasslands and shrublands with sandier soils.
Spilogale gracilis Western Spotted Skunk	Mephitidae Skunks	PSOC	G5	SU	Bitterroot, Beaverhead/Deerlodge, Custer, Gallatin, Helena	Billings, Butte, Dillon, Missoula	2, 3, 5, 7	Riparian shrub	Woody or brushy areas along streams or near outcrops should be targeted for survey; recent detections have all been with camera traps.
Tamias umbrinus Uinta Chipmunk	Sciuridae Squirrels	PSOC	G5	SU	Custer, Gallatin	Billings, Butte	3, 5	High elevation conifer forest	Need targeted surveys in all high mountain ranges adjacent to the border with northwestern Wyoming.
Thomomys idahoensis Idaho Pocket Gopher	Geomyidae Pocket Gophers	PSOC	G4	S2S4	Beaverhead/Deerlodge	Dillon	3	Open habitat / generalist	In southwestern Montana, the species' northern range boundary and habitat occupancy rates both need to be assessed relative to the distribution of Northern Pocket Gopher.
Urocitellus armatus Uinta Ground Squirrel	Sciuridae Squirrels	PSOC	G5	S3S4	Beaverhead/Deerlodge, Custer, Gallatin	Butte, Dillon	3, 5	Open grassy edges	Need targeted surveys for the species in subalpine meadows and forest edges.
Zapus hudsonius Meadow Jumping Mouse	Dipodidae Jumping Mice	PSOC	G5	SU	Custer	Billings, Miles City	7	Riparian and moist grassland	Need surveys targeting riparian areas and moist grasslands across southeastern Montana.

BIRDS (AVES)									14 SPECIES
SCIENTIFIC NAME COMMON NAME TAXA SORT	FAMILY (SCIENTIFIC) FAMILY (COMMON)	MT STATUS	GLOBAL RANK	STATE RANK	USFS FOREST	BLM FIELD OFFICE	FWP REGION	HABITAT	COMMENTS

Aegolius funereus Boreal Owl	Strigidae Owls	PSOC	G5	S3S4	Beaverhead/Deerlodge, Bitterroot, Custer, Flathead, Gallatin, Helena, Kootenai, Lewis and Clark, Lolo	Butte, Dillon, Missoula	1, 2, 3, 4, 5	Conifer forest	Need call playback surveys of conifer forests.
Bucephala islandica Barrow's Goldeneye	Anatidae Swans / Geese / Ducks	PSOC	G5	S4	Beaverhead/Deerlodge, Bitterroot, Flathead, Gallatin, Helena, Lewis and Clark, Lolo, Kootenai	Billings, Butte, Dillon, Lewistown, Missoula	1, 2, 3, 4, 5	Mountain Lakes and Wetlands	Need surveys of mountain lakes and wetlands.
Chaetura pelagica Chimney Swift	Apodidae Swifts	PSOC	G4G5	S3S4B	Custer	Butte, Glasgow, Havre, Miles City, Phillips, Upper Missouri River National Monument	5, 6, 7	Chimneys, caves, hollow trees	Need surveys of potential roost sites.
Coccyzus americanus Yellow-billed Cuckoo	Cuculidae Cuckoos	SOC	G5	S3B	All Forests	Billings, Butte, Dillon, Lewistown, Miles City, Missoula	1,2,3, 4, 5, 7	Prairie riparian forest	Need call playback surveys along lower elevation riparian areas.
Coccyzus erythrophthalmus Black-billed Cuckoo	Cuculidae Cuckoos	SOC	G5	S3B	Beaverhead/Deerlodge, Custer, Gallatin, Helena, Lewis and Clark	Billings, Butte, Dillon, Glasgow, Havre, Lewistown, Phillips County, Upper Missouri River National Monument	3, 4, 5, 6, 7	Riparian forest	Need call playback surveys along lower elevation riparian areas east of the Continental Divide.
Cypseloides niger Black Swift	Apodidae Swifts	SOC	G4	S1B	Beaverhead/Deerlodge, Bitterroot, Flathead, Kootenai, Lewis and Clark, Lolo	Missoula	1, 2, 3, 4, 5	Waterfalls	Need surveys of potential waterfall nest sites.
Lagopus leucura White-tailed Ptarmigan	Phasianidae Upland Game Birds	SOC	G5	S3	Flathead, Helena, Lewis and Clark, Lolo		1,4	Alpine	Need treeline/alpine surveys.
Leucosticte tephrocotis Gray-crowned Rosy-Finch	Fringillidae Finches	SOC	G5	S2B,S5N	Beaverhead/Deerlodge, Bitterroot, Flathead, Helena, Kootenai, Lewis and Clark		1, 2, 4	Alpine	Need surveys of areas near cliffs and talus that are among glaciers and snowfields above treeline.
Lophodytes cucullatus Hooded Merganser	Anatidae Swans / Geese / Ducks	PSOC	G5	S4	Beaverhead/Deerlodge, Bitterroot, Flathead, Gallatin, Helena, Lewis and Clark, Lolo, Kootenai	Billings, Butte, Dillon, Missoula	1, 2, 3, 4, 5	Rivers, Riparian/Wetland	Need stream surveys.
Megascops kennicottii Western Screech-Owl	Strigidae Owls	PSOC	G4G5	S3S4	Beaverhead/Deerlodge, Bitterroot, Flathead, Gallatin, Helena, Lewis and Clark, Lolo	Butte, Dillon, Missoula	1, 2, 3, 4	Riparian forest	Need nocturnal call playback surveys along lower elevation riparian areas across western Montana.
Phalaenoptilus nuttallii Common Poorwill	Caprimulgidae Nightjars	PSOC	G5	S4B	All forests	All field offices	All regions	Shrub grassland	Need baseline nocturnal calling surveys in grasslands and shrublands.
Selasphorus platycercus Broad-tailed Hummingbird	Trochilidae Hummingbirds	PSOC	G5	S4B	Beaverhead/Deerlodge, Custer, Gallatin	Billings, Butte, Dillon	3, 5, 7	Montane shrublands / woodlands	Need surveys in shrubby hillside and open forest habitats during the known breeding period; preferably with trapping surveys to confirm reproduction.
Strix nebulosa Great Gray Owl	Strigidae Owls	SOC	G5	S3	Beaverhead/Deerlodge, Bitterroot, Custer, Flathead, Gallatin, Helena, Kootenai, Lewis and Clark, Lolo	Butte, Dillon, Missoula	1, 2, 3, 4, 5	Conifer forest near open meadows	Need nocturnal call playback surveys of meadows and other open areas within conifer forests.

Surnia ulula Northern Hawk Owl	Strigidae Owls	SOC	G5	S3	Flathead, Lewis and Clark, Kootenai		1, 4	Conifer forest	Need surveys in conifer forests, especially in post-fire landscapes, within and around their known breeding range.
--	--------------------------	-----	----	----	-------------------------------------	--	------	----------------	--

REPTILES (REPTILIA) 7 SPECIES

SCIENTIFIC NAME COMMON NAME TAXA SORT	FAMILY (SCIENTIFIC) FAMILY (COMMON)	MT STATUS	GLOBAL RANK	STATE RANK	USFS FOREST	BLM FIELD OFFICE	FWP REGION	HABITAT	COMMENTS
Chelydra serpentina Snapping Turtle	Chelydridae Snapping Turtles	SOC	G5	S3	Custer	Billings, Miles City	5, 7	Prairie rivers and streams	Need trapping surveys on permanent waters; especially rivers and streams.
Elgaria coerulea Northern Alligator Lizard	Anguidae Alligator Lizards	SOC	G5	S3	Bitterroot, Flathead, Kootenai, Lolo	Missoula	1, 2	Talus slopes / rock outcrops	Need surveys of the margins of talus slopes below the subalpine.
Heterodon nasicus Plains Hog-nosed Snake	Colubridae Colubrid Snakes	SOC	G5	S2	Custer	Billings, Glasgow, Havre, Lewistown, Miles City, Phillips County, Upper Missouri River Breaks	4, 5, 6, 7	Friable soils	Need funnel trap surveys of sand/gravelly soils, particularly in and adjacent to riparian areas.
Opheodrys vernalis Smooth Greensnake	Colubridae Colubrid Snakes	SOC	G5	S2		Miles City	6	Wetlands	Need road and wetland/wet meadow habitat surveys across and slightly beyond their known range during wetter weather in May, June, and early July.
Phrynosoma douglasii Pygmy Short-horned Lizard	Phrynosomatidae Sagebrush / Spiny Lizards	PSOC	G5	SU	Beaverhead/Deerlodge	Dillon	3	Sandy/gravelly soils in grassland and shrubland	One 1936 museum record from "Centennial Valley, Montana" and more recent unverified observation record from upper Horse Prairie Creek southwest of Dillon.
Phrynosoma hernandesi Greater Short-horned Lizard	Phrynosomatidae Sagebrush / Spiny Lizards	SOC	G5	S3	Beaverhead/Deerlodge, Custer, Gallatin, Helena, Lewis and Clark	Butte, Billings, Dillon, Glasgow, Havre, Lewistown, Miles City, Phillips County, Upper Missouri River National Monument	3, 4, 5, 6, 7	Sandy / gravelly soils	Need visual encounter surveys of sandy/gravelly soils in grasslands and shrublands.
Plestiodon skiltonianus Western Skink	Scincidae Skinks	SOC	G5	S3	Bitterroot, Kootenai, Lolo	Missoula	1, 2	Open conifer forest and adjacent grasslands	Need pitfall trap surveys targeting open conifer forests and adjacent grasslands.

FISH (ACTINOPTERYGII) 3 SPECIES

SCIENTIFIC NAME COMMON NAME TAXA SORT	FAMILY (SCIENTIFIC) FAMILY (COMMON)	MT STATUS	GLOBAL RANK	STATE RANK	USFS FOREST	BLM FIELD OFFICE	FWP REGION	HABITAT	COMMENTS
Myoxocephalus thompsonii Deepwater Sculpin	Cottidae Sculpins	SOC	G5	S3		Havre	4	Deep mountain lakes	Only documented on the Canadian side of Upper Waterton Lake.
Percopsis omiscomaycus Trout-perch	Percopsidae Trout-perch	SOC	G5	S2		Havre	4	Deep lakes, mountain streams	Need focal surveys of deepwater lake habitats and associated tributaries across their range: gillnetting, seining.
Prosopium coulteri Pygmy Whitefish	Salmonidae Trout	SOC	G5	S3	Flathead, Kootenai		1, 4	Deep mountain lakes and tributaries	Need gill netting and slat trap surveys of deepwater lake habitats.

SOC and PSOC with Outdated Surveys
All Records (no filtering)

MAMMALS (MAMMALIA)									1 SPECIES
SCIENTIFIC NAME COMMON NAME TAXA SORT	FAMILY (SCIENTIFIC) FAMILY (COMMON)	MT STATUS	GLOBAL RANK	STATE RANK	USFS FOREST	BLM FIELD OFFICE	FWP REGION	HABITAT	COMMENTS
<i>Synaptomys borealis</i> Northern Bog Lemming	<i>Cricetidae</i> New World Mice / Rats / Voles	SOC	G5	S2	Beaverhead/Deerlodge, Bitterroot, Flathead, Kootenai, Lewis and Clark, Lolo	Missoula	1, 2, 4	Conifer forest wetland	Baseline surveys date to the 1990s. Need surveys of wet meadow and fen habitats with sphagnum moss.

BIRDS (AVES)									2 SPECIES
SCIENTIFIC NAME COMMON NAME TAXA SORT	FAMILY (SCIENTIFIC) FAMILY (COMMON)	MT STATUS	GLOBAL RANK	STATE RANK	USFS FOREST	BLM FIELD OFFICE	FWP REGION	HABITAT	COMMENTS
<i>Leucosticte atrata</i> Black Rosy-Finch	<i>Fringillidae</i> Finches	SOC	G4	S2	Beaverhead/Deerlodge, Bitterroot, Custer, Gallatin, Helena	Dillon	2, 3, 4, 5	Alpine	Species received some baseline survey effort in 1968 and again in 1983 that covered most of the known range of the species in the state. Currently FWP biologists are conducting range wide surveys targeting alpine nesting habitats (crevices in alpine cliffs and talus) and snowfields to provide more robust information about this species.
<i>Sternula antillarum</i> Least Tern	<i>Laridae</i> Gulls / Terns	SOC	G4	S1B		Miles City	7	Large prairie rivers	Last systematic surveys on the lower Yellowstone River date to the 1990s. Need surveys of unvegetated sand-pebble beaches of shorelines and islands.

AMPHIBIANS (AMPHIBIA)									1 SPECIES
SCIENTIFIC NAME COMMON NAME TAXA SORT	FAMILY (SCIENTIFIC) FAMILY (COMMON)	MT STATUS	GLOBAL RANK	STATE RANK	USFS FOREST	BLM FIELD OFFICE	FWP REGION	HABITAT	COMMENTS
<i>Plethodon idahoensis</i> Coeur d'Alene Salamander	<i>Plethodontidae</i> Lungless Salamanders	SOC	G4	S2	Bitterroot, Kootenai, Lolo		1, 2	Spring / seep, waterfall, fractured rock	Range-wide baseline surveys date to the 1980s. More recent surveys have been conducted in Northwestern Montana, but surveys are still needed in the central and southern portions of this species range. Need surveys of waterfall spray zones, springs, seeps, and streambanks that have underground cracks, crevices, and chambers that have year round water.

INVERTEBRATES - MOLLUSKS									1 SPECIES
SCIENTIFIC NAME COMMON NAME TAXA SORT	FAMILY (SCIENTIFIC) FAMILY (COMMON)	MT STATUS	GLOBAL RANK	STATE RANK	USFS FOREST	BLM FIELD OFFICE	FWP REGION	HABITAT	COMMENTS
<i>Fisherola nuttalli</i> Shortface Larx	<i>Lymnaeidae</i> Fossarials / Pondsnails / Larx	PSOC	G2	SH	Bitterroot, Lolo	Missoula	Region 2	Large Mountain Rivers	Need surveys of historically occupied cold fast streams and rivers with cobble-boulder diatom covered substrates in the Clark Fork River basin.

Non SOC that Lack Baseline Surveys
All Records (no filtering)

MAMMALS (MAMMALIA)									9 SPECIES
SCIENTIFIC NAME COMMON NAME TAXA SORT	FAMILY (SCIENTIFIC) FAMILY (COMMON)	MT STATUS	GLOBAL RANK	STATE RANK	USFS FOREST	BLM FIELD OFFICE	FWP REGION	HABITAT	COMMENTS

Glaucomys sabrinus Northern Flying Squirrel	Sciuridae Squirrels		G5	S4	Lewis and Clark, Helena, Custer Gallatin, Bitterroot, Flathead, Beaverhead-Deerlodge, Lolo, Kootenai	Missoula, Butte, Billings, Dillon, Lewistown	1, 2, 3, 4, 5	Conifer forest	All observations are incidental. The species geographic range may be broader than is currently recognized. Species needs surveys of forested areas across its known and potential geographic range in the state using nest boxes, live tomahawk traps with wax card board shelters, or potentially camera traps.
Lepus townsendii White-tailed Jack Rabbit	Leporidae Rabbits		G5	S4	Lewis and Clark, Helena, Custer Gallatin, Bitterroot, Flathead, Beaverhead-Deerlodge, Lolo	Missoula, Miles City, Butte, Billings, Dillon, Malta, Lewistown	1, 2, 3, 4, 5, 6, 7	Grasslands	Structured surveys are needed for this species across the state. Spotlighting and/or visual encounter surveys along roads at night should be adequate to establish baselines for this species.
Neotoma cinerea Bushy-tailed Woodrat	Cricetidae New World Mice / Rats / Voles		G5	S5	Lewis and Clark, Helena, Custer Gallatin, Bitterroot, Flathead, Beaverhead-Deerlodge, Lolo, Kootenai	Missoula, Miles City, Butte, Billings, Dillon, Malta, Lewistown	1, 2, 3, 4, 5, 6, 7	Generalist	Species has never really been targeted with surveys and the majority of observations are incidental or detections of middens. To determine baseline metrics, systematic surveys of suitable structures like cliffs, rock outcrops, and caves is necessary across this species range.
Ochotona princeps Pika	Ochotonidae Pikas		G5	S4	Lewis and Clark, Helena, Custer Gallatin, Bitterroot, Flathead, Beaverhead-Deerlodge, Lolo, Kootenai	Missoula, Butte, Billings, Dillon, Malta, Lewistown	1, 2, 3, 4, 5	Montane talus	Systematic surveys are limited to the Bitterroot Mountains and relatively small areas in the Absoraka/Beartooths. Across other ranges, observations are primarily incidental in nature. Species needs systematic surveys of talus, boulder fields, and adjacent meadow habitats across a range of elevations throughout their known breeding range in the state.
Sciurus niger Eastern Fox Squirrel	Sciuridae Squirrels		G5	S4	Custer Gallatin	Miles City, Billings	5,7	Deciduous forest	Within the native range of this species, no taxa specific surveys have been conducted and other small mammal survey methods are unlikely to detect this species. Visual encounter transects or tomahawk live trapping along ash draws and riparian corridors in SC and SE Montana is needed to establish robust baselines for this species.
Sylvilagus audubonii Desert Cottontail	Leporidae Rabbits		G5	S4	Custer, Lewis and Clark	Billings, Glasgow, Havre, Lewistown, Miles City, Phillips County, Upper Missouri River National Monument	4, 5, 6, 7	Upland grassland / upland breaks	Range-wide systematic surveys are needed for all cottontail species. Identification of cottontail species can be problematic in areas where the ranges of Desert Mountain, and/or Eastern Cottontail overlap. To gain information about the status of this species live trapping efforts across E Montana are necessary.
Sylvilagus floridanus Eastern Cottontail	Leporidae Rabbits		G5	S4	Custer	Miles City	7	Riparian shrub	Summer and winter headlight/spotlight surveys need to be conducted in riparian areas across the species' known range. Trapping/handling may be needed to distinguish from Desert Cottontail with certainty.
Sylvilagus nuttallii Mountain Cottontail	Leporidae Rabbits		G5	S4	Lewis and Clark, Helena, Custer Gallatin, Bitterroot, Flathead, Beaverhead-Deerlodge, Lolo, Kootenai	Missoula, Miles City, Butte, Billings, Dillon, Malta, Lewistown	1, 2, 3, 4, 5, 6, 7	Sagebrush, willow, riparian	Baseline surveys across central and eastern Montana are needed for this and other cottontail species. Although track and spotlight surveys are appropriate for regions with a single species, due similar appearance and habitat associations of this group, surveys conducted in areas with multiple cottontail species should use methods that allow in hand identification.

Thomomys talpoides Northern Pocket Gopher	Geomyidae Pocket Gophers		G5	S5	Lewis and Clark, Helena, Custer, Gallatin, Bitterroot, Flathead, Beaverhead- Deerlodge, Lolo, Kootenai	Missoula, Butte, Billings, Dillon, Lewistown	1, 2, 3, 4, 5	Open habitat / generalist	Surveys targeting Pocket Gophers need to be conducted across Beaverhead, Madison, Gallatin, Ravalli, Granite, Deerlodge, and Silver Bow Counties in order to determine the range boundaries and degree of overlap in ranges of Idaho and Northern Pocket Gophers. Taxa specific live trapping methods and/or EDNA collection from spoil piles or burrows should be implemented. Across the rest of Montana, Northern Pocket Gopher distribution and status information could easily be gathered through documentation of excavation spoil piles.
---	------------------------------------	--	----	----	---	--	---------------	---------------------------	--

BIRDS (AVES)									15 SPECIES
SCIENTIFIC NAME COMMON NAME TAXA SORT	FAMILY (SCIENTIFIC) FAMILY (COMMON)	MT STATUS	GLOBAL RANK	STATE RANK	USFS FOREST	BLM FIELD OFFICE	FWP REGION	HABITAT	COMMENTS
Actitis macularius Spotted Sandpiper	Scolopacidae Sandpipers		G5	S5B	Lewis and Clark, Helena, Custer, Gallatin, Bitterroot, Flathead, Beaverhead- Deerlodge, Lolo, Kootenai	Missoula, Miles City, Butte, Billings, Dillon, Malta, Lewistown	1, 2, 3, 4, 5, 6, 7	Wetland margin	Although this species may be documented incidentally during other structured surveys, current survey effort is not adequate to establish baseline metrics for this species. Surveys targeting streams and rivers across this species range are necessary.
Aeronautes saxatalis White-throated Swift	Apodidae Swifts		G5	S5B	Lewis and Clark, Helena, Custer, Gallatin, Bitterroot, Flathead, Beaverhead- Deerlodge, Lolo, Kootenai	Missoula, Miles City, Butte, Billings, Dillon, Malta, Lewistown	1, 2, 3, 4, 5, 6, 7	Cliffs / canyons	Observations are mostly incidental from a variety of citizen birders. Need a survey effort targeting cliff roosting/nesting sites across western and southeastern Montana.
Archilochus alexandri Black-chinned Hummingbird	Trochilidae Hummingbirds		G5	S4B	Lewis and Clark, Helena, Custer, Gallatin, Bitterroot, Flathead, Beaverhead- Deerlodge, Lolo, Kootenai	Missoula, Butte, Billings, Dillon	1, 2, 3, 4	Riparian forest	Species is not well represented by BBS, IMBCR, or other point count surveys. Most data has come from citizen birders or special efforts like Ned and Gigi Batchelder's trapping program. Need more focal surveys of preferred shrubby hillside and open forest habitats during the known breeding period; preferably with trapping surveys to confirm reproduction.
Bucephala albeola Bufflehead	Anatidae Swans / Geese / Ducks		G5	S5B	Lewis and Clark, Helena, Custer, Gallatin, Bitterroot, Flathead, Beaverhead- Deerlodge, Lolo, Kootenai	Missoula, Miles City, Butte, Billings, Dillon, Malta, Lewistown	1, 2, 3, 4, 5, 6, 7	Wetlands	Range-wide waterbird surveys led by FWP were conducted in 1996 and 2009-1010, although coverage was poor in SW Montana. Other surveys associated with Wildlife Refuges are performed more regularly. Across the rest of the range survey effort is inadequate or to determine state-wide baseline metrics for the species.
Bucephala clangula Common Goldeneye	Anatidae Swans / Geese / Ducks		G5	S5	Lewis and Clark, Helena, Custer, Gallatin, Bitterroot, Flathead, Beaverhead- Deerlodge, Lolo, Kootenai	Missoula, Miles City, Butte, Billings, Dillon, Malta, Lewistown	1, 2, 3, 4, 5, 6, 7	Wetlands	Species breeds in mountain lakes. Although they are detected on annual Wildlife Refuge and WPA surveys this does not provide adequate range-wide survey coverage. Targeted surveys of suitable waterbodies in the spring and summer will provide baseline data and help assess the status of this species in Montana.
Chaetura vauxi Vaux's Swift	Apodidae Swifts		G5	S4B	Lewis and Clark, Helena, Custer, Gallatin, Bitterroot, Flathead, Beaverhead- Deerlodge, Lolo, Kootenai	Missoula, Butte, Lewistown	1, 2	Moist conifer forests	Observations are mostly incidental from a variety of citizen birders and confirmed breeding has mostly been documented through detection of injured fledglings. Need a survey effort targeting likely roost sites in urban areas across western Montana.

Chordeiles minor Common Nighthawk	Caprimulgidae Nightjars		G5	S5B	Lewis and Clark, Helena, Custer Gallatin, Bitterroot, Flathead, Beaverhead-Deerlodge, Lolo, Kootenai	Missoula, Miles City, Butte, Billings, Dillon, Malta, Lewistown	1, 2, 3, 4, 5, 6, 7	Grasslands	Species is almost exclusively reported through incidental observations. Need statewide surveys of this species using Western Working Group of Partners in Flight protocols. This could possibly be combined with surveys for other nocturnal bird species.
Empidonax wrightii Gray Flycatcher	Tyrannidae Flycatchers		G5	S4B	Custer Gallatin, Beaverhead-Deerlodge	Billings, Dillon	3, 5	Sagebrush	Species is a rare summer breeder and not covered by the annual BBS survey routes and IMBCR and/or other point count efforts given their rarity. The species' distribution/status may best be tracked by citizen birders surveying appropriate sagebrush habitats in and around the areas in SW and SC Montana where they have been previously detected.
Gallinago delicata Wilson's Snipe	Scolopacidae Sandpipers		G5	S5	Lewis and Clark, Dakota Prairie Grasslands, Helena, Custer Gallatin, Bitterroot, Flathead, Beaverhead-Deerlodge, Lolo, Kootenai	Missoula, Miles City, Butte, Billings, Dillon, Malta, Lewistown	1, 2, 3, 4, 5, 6, 7	Wet meadows	This species is detected by BBS and other point counts, but spring nocturnal bird calling surveys may be necessary to establish robust baseline metrics. It may be possible to pair this survey work with nocturnal amphibian calling surveys.
Glaucidium gnoma Northern Pygmy-Owl	Strigidae Owls		G4G5	S4	Lewis and Clark, Helena, Custer Gallatin, Bitterroot, Flathead, Beaverhead-Deerlodge, Lolo, Kootenai	Missoula, Butte, Billings, Dillon, Lewistown	1, 2, 3, 4, 5	Conifer forest	Need to establish a late winter / early spring rangewide call playback survey beyond what has been done by the ORI for a portion of western Montana, and the early 1990s surveys by MTNHP on portions of the Gallatin and Lewis and Clark National Forests.
Junco hyemalis aikeni Dark-eyed Junco (White-winged)	Passerellidae New World Sparrows		G5T4	SNR	Custer Gallatin	Miles City	7	Forest	Species had some baseline surveys done in association with Northern Goshawk calling stations on portions of the Sioux District of the Custer National Forest, but needs focal surveys on other Ponderosa Pine savannah across and adjacent to their known range in SE Montana.
Mergus merganser Common Merganser	Anatidae Swans / Geese / Ducks		G5	S5B	Lewis and Clark, Helena, Custer Gallatin, Bitterroot, Flathead, Beaverhead-Deerlodge, Lolo, Kootenai	Missoula, Miles City, Butte, Billings, Dillon, Malta, Lewistown	1, 2, 3, 4, 5, 6, 7	Montane rivers	Although this species is included with the annual May USFWS waterfowl population and habitat (HAPET) surveys, these surveys are only conducted across eastern Montana and western Montana receives little survey effort. To determine state-wide baseline metrics, streams surveys targeting this species are needed.
Selasphorus calliope Calliope Hummingbird	Trochilidae Hummingbirds		G5	S5B	Lewis and Clark, Helena, Custer Gallatin, Bitterroot, Flathead, Beaverhead-Deerlodge, Lolo, Kootenai	Missoula, Butte, Billings, Dillon, Lewistown	1, 2, 3, 4, 5	Conifer forest	Species is not well represented by BBS, IMBCR, or other point count surveys. Most data has come from citizen birders or special efforts like Ned and Gigi Batchelder's trapping program. Need more focal surveys of preferred shrubby hillside and open forest habitats during the known breeding period; preferably with trapping surveys to confirm reproduction.
Spizella breweri taverneri Brewer's Sparrow (Timberline)	Passerellidae New World Sparrows		G5T4T5	SNRTNR	Lewis and Clark	Malta, Lewistown	4	Krummholz shrubs at treeline	Need systematic baseline surveys of subalpine shrub habitats along the east front of the Rocky Mountains.

Strix varia Barred Owl	Strigidae Owls		G5	S4	Lewis and Clark, Helena, Custer, Gallatin, Bitterroot, Flathead, Beaverhead- Deerlodge, Lolo, Kootenai	Missoula, Butte, Dillon, Malta, Lewistown	1, 2, 3, 4	Conifer forest	Need to establish a late winter / early spring rangewide call playback survey beyond what has been done by the ORI for a portion of western Montana, and the early 1990s surveys by MTNHP on portions of the Gallatin and Lewis and Clark National Forests.

REPTILES (REPTILIA)									1 SPECIES
SCIENTIFIC NAME COMMON NAME TAXA SORT	FAMILY (SCIENTIFIC) FAMILY (COMMON)	MT STATUS	GLOBAL RANK	STATE RANK	USFS FOREST	BLM FIELD OFFICE	FWP REGION	HABITAT	COMMENTS
Charina bottae Northern Rubber Boa	Boidae Boas		G5	S4	Lewis and Clark, Helena, Custer, Gallatin, Bitterroot, Flathead, Beaverhead- Deerlodge, Lolo, Kootenai	Missoula, Miles City, Butte, Billings, Dillon, Lewistown	1, 2, 3, 4, 5, 7	Montane forest	Current data is completely incidental. Species needs focal road surveys on evenings after thunderstorms in June and July across their known range. This might be able to be paired with other fieldwork. Since 2012 several observations of this species have been reported to the northeast of the Bighorn Mountains extending the range of this species into Southeastern Montana. Future survey efforts should include this area to provide further data on its range in this area.
