# Canada Lynx (*Lynx canadensis*) Conservation Status Rank Summary

October 1, 2024

For details on assessment and ranking methodology, see: <u>Conservation Status Assessment Definitions, Process,</u>
<u>Rank Factors, and Calculation of State Ranks for Montana Species</u>

# **Rarity and Trends**

Rank Factor	Date Value Assessed		Score	Data Source	Comments
Rarity					
Range Extent	2024-05-13	Y: 152175.4 km²	3.930	MTNHP Range Maps	None
Area of Occupancy	2024-05-13	6192   4km² cells	4.810	MTNHP Modeling	None
Number of Occurrences	2024-05-13	10	1.380	MTNHP Databases	None
<b>Population Size</b>			-		Factor not used in ranking.
# of Occurrences in Good Condition	2024-05-13		2.200		None
% of Area Occupied in Good Condition			-		Factor not used in ranking.
Environmental Specificity	2024-10-01	Narrow	-	MTNHP Data	<b>Factor not used in ranking.</b> Species uses mature forest with suitable prey species

Rarity is calculated by averaging weighted factor scores:  $(3.93 \times 1) + (4.81 \times 2) + (1.38 \times 1) + (2.20 \times 2) / 6 = 3.22$ 

Trends					
Short-term Trend	2024-05-13	C	0.000	USFWS 2023	Occupancy appears stable with a potential minor contraction in the Garnet Mountains
Long-term Trend	2024-10-01	-(	0.070		None

Trends score is calculated by summing weighted short and long-term trend scores:  $((0.00 \times 2) + (-0.07 \times 1)) = -0.07$ 

### **Threats**

Rank Factor Date Assessed		Value	Score Data Source		Comments		
Threats							
Overall Threat Impact		Medium	3.670		None		
Intrinsic Vulnerability	2024-10-01	Not intrinsically vulnerable	-	MTNHP Data	Factor not used in ranking. Species breeds annually and has good despersal capabilities		

Threat score is calculated from Overall Threat Impact when available or Intrinsic Vulnerability if not: (3.67) = 3.67

#### **Individual Threats Data**

Threat Category	Date Assessed	Impact Score	Scope	Severity	Immediacy	Comments
Biological Resource Use	2024-05-13	Low	Restricted	Moderate	High	Some harvest practices can adversely impact the species
Natural System Modifications	2024-05-13	Low	Pervasive	Slight	High	None
Climate Change & Severe Weather	2024-05-13	Medium	Pervasive	Moderate	High	None

Threat Tally: 0 - Very High, 0 - High, 1 - Medium, 2 - Low Overall Threat Impact\* = Medium

<sup>\*</sup>See <u>Conservation Status Assessment Definitions</u>, <u>Process</u>, <u>Rank Factors</u>, <u>and Calculation of State Ranks for Montana Species</u> for calculation of Overall Threat Impact based on the number and impact of individual threats.

#### **Conservation Status Rank Calculation**

#### Raw score

Rarity:  $(3.22 \times 70\%)$  + Threats:  $(3.67 \times 30\%)$  + Trends: (-0.07) = 3.29

Calculated Rank: S3

Accepted Rank	S3				
Date Approved	Date Unknown				
Approval Authority	Legacy Assessment: MTNHP Staff				
Rank Justification	Species is rare to uncommon across northwest and west central Montana. Is appears that occupancy is relatively stable and faces threats related to loss of mature forests and habitat fragmentation due to forestry practices, fire, and climate change.

## **Information Needs**

Information needs are assessed by considering the availability of factors used to assess species status as well as the quality of these assessments. Current information availability and quality to inform Conservation Status Rank for this species are highlighted.

Rank	Assessment		Criteria				
Factor	Category	Value					
General	General Status Quality		Calculated rank has low uncertainty and is represented by a single rank (e.g. S3); accepted rank may be adjusted to a range rank (e.g. S2S3)				
Status	Status Quality	Poor	Rank assessed as SU or calculated rank has notable uncertainty and corresponds to a range rank with 2 or more values (e.g. S2?, S1S3, or S4S5)				
	Danas Ovalitu	Adequate	Range polygon adequately represents area of probable occupancy and does not include substantial unoccupied areas; range may be adequately defined and still include areas of unsuitable habitat (e.g. mountain ranges for plains species)				
	Range Quality	Marginal	Range polygon defined, but may include or exclude notable areas where the species may or may not occur on the landscape				
Rarity		Poor	Range polygon not defined				
		Adequate	Species-habitat relationship is well-defined (e.g. relevant literature or robust habitat model available)				
	Habitat Quality	Marginal	Understanding of species-habitat relationship is adequate among some but not all habitats  (e.g. literature covers similar habitats outside of Montana or habitat model performance is only somewhat adequate)				
		Poor	Species-habitat relationship is not well understood				
		Adequate	Threat Impact is a single value (including "Unthreatened")				
Threats	Throat Quality	Marginal	Threat Impact assessed at more than one value (e.g. "High - Medium")				
inreats	Threat Quality	Poor	Threat Impact is Unknown but Intrinsic Vulnerability is assessed				
		Unknown	Threat Impact is Unknown and Intrinsic Vulnerability is not assessed				
		Current	Short-term Trend assessment date less than 10 years old				
	Recency	Out of Date but Adequate	Short-term Trend assessment date is more than 10 years old or Unknown, but species is Unthreatened				
Trends		Out of Date	Short-term Trend assessment date more than 10 years old				
		Not Available	Short-term Trend data are not available				
	Trend Quality	Sufficient	Short-term Trend assessed at a single value or multiple values with a minimum trend greater than -10% (stable or increasing)				
		Unknown but Sufficient	Short-term Trend is Unknown, but species is Unthreatened				
		Poor	Short-term Trend is less than -10% (in decline) with two or more values selected				
		Unknown	Short-term Trend is Unknown				

## **Summary of Information Availability**

Data to assess status are available

#### **Summary of Information Needs**

No additional information are needed at this time.

## **Additional Threat Details**

The table below contains the complete threats assessment for this species. While the Conservation Status Rank Calculation is based on cumulative, broadly categorized (Level 1) threats data, threats are assessed and tracked for more specifically categorized (Level 2) threats when available.

Threat Category	Date Assessed	Assessed By	Data Source	Scope	Severity	Imme- diacy	Comments
Biological Resource Use - 5.3 - Logging & Wood Harvesting	2024-05-13	None	None	Restricte d	Moderate	High	Some harvest practices can adversely impact the species
Natural System Modifications - 7.1 - Fire & Fire Suppression	2024-05-13	None	None	Pervasiv e	Slight	High	None
Climate Change & Severe Weather - 11.1 - Habitat Shifting & Alteration	2024-05-13	None	None	Pervasiv e	Moderate	High	None
