Plains Gartersnake (*Thamnophis radix*) Conservation Status Rank Summary

January 28, 2025

For details on assessment and ranking methodology, see: <u>Conservation Status Assessment Definitions, Process,</u>
<u>Rank Factors, and Calculation of State Ranks for Montana Species</u>

Rarity and Trends

Rank Factor Date Assessed		Value	Score	Data Source	Comments		
Rarity							
Range Extent	2025-01-28	Y: 236964.2 km²	4.710	MTNHP Range Maps	None		
Area of Occupancy	2025-01-28	11663 4km² cells	4.810	MTNHP Modeling	None		
Number of Occurrences			-		Factor not used in ranking.		
Population Size			-		Factor not used in ranking.		
# of Occurrences in Good Condition			-		Factor not used in ranking.		
% of Area Occupied in Good Condition			-		Factor not used in ranking.		
Environmental Specificity	2018-05-03	Moderate	-	MTNHP Species Rank Data Table	Factor not used in ranking. Within its range this species is associated with a wide range of habitats Methodology: NS (2003) Original Score: C		

Rarity is calculated by averaging weighted factor scores: $((4.71 \times 1) + (4.81 \times 2)) / 3 = 4.78$

Trends								
Short-term Trend	2018-05-03	0.000	MTNHP Species Rank Data Table	Species is regularly found during surveys of lentic sites within its range Methodology: NS (2003) Original Score: E				
Long-term Trend	2018-05-03	0.000	MTNHP Species Rank Data Table	Habitat is likely stable within +/- 25% since European settlement, the increasing in stock ponds may have increased the amount of habitat for this species Methodology: NS (2003) Original Score: E				

Trends score is calculated by summing weighted short and long-term trend scores: $((0.00 \times 2) + (0.00 \times 1)) = 0.00$

Threats

Rank Factor Date Assessed		Value	Score Data Source		Comments	
Threats						
Overall Threat Impact		Low/No Threats	5.500		No operational threats in the next 15-20 years identified	
Intrinsic Vulnerability	2018-05-03	Moderately - vulnerable		MTNHP Species Rank Data Table	Factor not used in ranking. Moderately Vulnerable. Species exhibits moderate age of maturity, frequency of reproduction, and/or fecundity such that populations generally tend to recover from decreases in abundance within 5- 20 years or 2-5 generations. Species has good dispersal ca Methodology: NS (2003) Original Score: B	

Threat score is calculated from Overall Threat Impact when available or Intrinsic Vulnerability if not: (5.50) = 5.50

Individual Threats Data

Threat Category	Date Assessed	Impact Score	Scope	Severity	Immediacy	Comments		
No Threat Identified	2025-01-28							
Threat Tally: 0 - Very High, 0 - High, 0 - Medium, 1 - Low Overall Threat Impact* = Low/No Threats								

^{*}See <u>Conservation Status Assessment Definitions</u>, <u>Process</u>, <u>Rank Factors</u>, <u>and Calculation of State Ranks for Montana Species</u> for calculation of Overall Threat Impact based on the number and impact of individual threats.

Conservation Status Rank Calculation

Raw score

Rarity: $(4.78 \times 70\%)$ + Threats: $(5.50 \times 30\%)$ + Trends: (0.00) = 4.99

Calculated Rank: S5

Accepted Rank	S5
Date Approved	2025-01-28
Approval Authority	MTNHP Staff
Rank Justification	Species is relatively common within suitable habitat and widely distributed across portions of the state.

Information Needs

Information needs are assessed by considering the availability of factors used to assess species status as well as the quality of these assessments. Current information availability and quality to inform Conservation Status Rank for this species are highlighted.

Rank	Rank Assessment						
Factor	Category	Value	Criteria				
General	General Status Constitution		Calculated rank has low uncertainty and is represented by a single rank (e.g. S3); accepted rank may be adjusted to a range rank (e.g. S2S3)				
Status	Status Quality	Poor	Rank assessed as SU or calculated rank has notable uncertainty and corresponds to a range rank with 2 or more values (e.g. S2?, S1S3, or S4S5)				
	Dan an Ovelite	Adequate	Range polygon adequately represents area of probable occupancy and does not include substantial unoccupied areas; range may be adequately defined and still include areas of unsuitable habitat (e.g. mountain ranges for plains species)				
	Range Quality	Marginal	Range polygon defined, but may include or exclude notable areas where the species may or may not occur on the landscape				
Rarity		Poor	Range polygon not defined				
		Adequate	Species-habitat relationship is well-defined (e.g. relevant literature or robust habitat model available)				
	Habitat Quality	Marginal	Understanding of species-habitat relationship is adequate among some but not all habitats (e.g. literature covers similar habitats outside of Montana or habitat model performance is only somewhat adequate)				
		Poor	Species-habitat relationship is not well understood				
		Adequate	Threat Impact is a single value (including "Unthreatened")				
Threats	Throat Ouglity	Marginal	Threat Impact assessed at more than one value (e.g. "High - Medium")				
inreats	Threat Quality	Poor	Threat Impact is Unknown but Intrinsic Vulnerability is assessed				
		Unknown	Threat Impact is Unknown and Intrinsic Vulnerability is not assessed				
	Recency	Current	Short-term Trend assessment date less than 10 years old				
		Out of Date but Adequate	Short-term Trend assessment date is more than 10 years old or Unknown, but species is Unthreatened				
		Out of Date	Short-term Trend assessment date more than 10 years old				
Trends		Not Available	Short-term Trend data are not available				
	Trend Quality	Sufficient	Short-term Trend assessed at a single value or multiple values with a minimum trend greater than -10% (stable or increasing)				
		Unknown but Sufficient	Short-term Trend is Unknown, but species is Unthreatened				
		Poor	Short-term Trend is less than -10% (in decline) with two or more values selected				
		Unknown	Short-term Trend is Unknown				

Summary of Information Availability

None

Summary of Information Needs

None

Additional Threat Details

The table below contains the complete threats assessment for this species. While the Conservation Status Rank Calculation is based on cumulative, broadly categorized (Level 1) threats data, threats are assessed and tracked for more specifically categorized (Level 2) threats when available.

Threat Category	Date Assessed	Assessed By	Data Source	Scope	Severity	Imme- diacy	Comments
No Threat Identified - 0	2025-01-28	None	None	None	None	None	None
